**Conergy celebrates the 10 year anniversary of its Canadian business**

**Edmonton, Alberta August 29, 2012** – 2012 marks the 10<sup>th</sup> anniversary for Conergy's Canadian operation. Conergy AG, headquartered in Hamburg, Germany, entered the Canadian market through its acquisition of ETI Solar whose operations in Canada date back to 2002. The team at Conergy Canada has been privileged to support the continued growth of the Canadian PV industry over these last 10 years, helping it grow from a boutique off-grid market to the diverse solar market place it is today.

Beyond Conergy's on-going focus and commitment to customer service the company has pioneered some important project and manufacturing milestones in Canada. Conergy provided equipment and engineering support to the very first project connected under the FIT program and was one of the first companies to offer its products to meet the domestic content requirements of the Ontario FIT program. The company released Ontario-made versions of its SunTop and SolarGiant mounting systems in November of 2009. It then brought the Conergy ON solar modules to market in May 2011 and in July Conergy introduced its new industry-leading low ballast mounting system, SolarFamulus Air. This new product will also be produced in in Ontario. Conergy continues to show its industry leadership in the Canadian market.

"We are proud of the work that we have completed together with our customers and partners over the last ten years and we look forward to continuing to support the growth of this market over the decades to come" said Jared Donald, Conergy Canada's President. "The solar market in Canada is one that is ever changing and companies like ours are successful here because we continue to innovate to ensure that we can provide solutions that help our partners' businesses."

Today, a decade later, Conergy's unique industry experience as a system supplier, operating in all parts of the solar industry value chain, is passed on to its clients in Canada and all around the world. From planning, engineering, financing and installation to maintenance and technical management, Conergy brings together the complete knowledge and strategies from all the "solar worlds" and is proud to call itself a true solar systems supplier.

### About Conergy

As a full system supplier, Conergy Group delivers solar energy systems from a single source and offers all services under one roof.

Through deep-rooted operations in 14 countries, Conergy System Sales sells premium Conergy products to customers in nearly 40 countries worldwide. Conergy supports homeowners, installers, wholesalers and investors in their efforts to "go solar." With local sales activities on five continents, Conergy has close relationships with all its customers. Listed on the Frankfurt stock exchange, Conergy employs close to 1,300 people worldwide. Since Conergy's founding in 1998, it has produced and sold more than 2 GW of clean solar power, and developed over 500 MW of solar parks.

Through its acquisition of well-established local companies, Conergy began operating as a distributor and project developer in North America in 2005 and currently has five offices, four warehouses and three production sites in the region. In North America, Conergy is both a manufacturer and wholesaler. Conergy manufactures mounting systems in Sacramento, CA. In Ontario, Canada, Conergy supplies modules and mounting systems that meet local content requirements for the Provincial FIT. Conergy offers innovative products and tailored services to its North American network of system integrators and project developers. Through these activities, Conergy maintains expert knowledge about local market conditions and requirements. For more information, please visit: [www.conergy.ca](http://www.conergy.ca).
