INTERCOM SYSTEM-PROFESSIONAL PRODUCT TABLE

The System 900/922 Series will meet most crew communications requirements. Setcom has other systems for unique applications.

Intercom System Series	TwinTalk™	Liberator X™	900/922	1300	1600
Application / Design Description	Setcom's easiest system to set up and use. Designed for two users to wirelessly communicate up to 1,200 feet apart.	Best used for intercom only purposes. Extreme noise cancelling capabilities for ultra high noise environments.	Setcom's most versatile crew communication system. Highly modular vehicle intercom system that accommodates most situations/radios.	Premier dual radio system. Unique split audio feature allows users to distinguish between simultaneous traffic on two different radios.	A 4-person, 6 radio intercom. The System 1600 is ideal for command vehicles. It allows crew members to select, monitor and transmit over all 6 radios simultaneously.
