Facility Results Expands Its Safety Training Team and Continues to Promote More Knowledge for Less Flash

Plymouth, Michigan. August 29, 2012—The goal of the trainers and training at Facility Results is to educate employees to effectively reduce their exposure to occupational hazards, especially those due to arc flash. To that end, the company has recently expanded its training team to include safety veteran and OSHA expert Cindy Rupert of Ravenswood, WV. Rupert, who has a long safety career including almost ten years as a manager and engineer with the Virginia Department of Labor and Industry, has hit the road running for Facility Results. She has already delivered NFPA 70E courses in Atlanta and Tulsa since she came on board with the company in June.

“Throughout my years of experience on the government side, I worked hard to balance the requirement for compliance with an understanding of what it takes to succeed on the business side. That’s a perspective my students and Facility Results’ clients, in general, can appreciate,” explains Rupert.

Rupert joins an established team of five other trainers at Facility Results, where they’ve been delivering the latest in practical and consistent methods for achieving occupational safety since the company was founded in 2009. Best known for its courses in the NFPA 70E electrical safety standard, the company also offers OSHA training, including Lockout/Tagout and Confined Space Assessment.

Offering combined safety experience totaling more than 60 years, the trainers at Facility Results have delivered more than 120 training sessions over the past three years to businesses across the country, ranging from Tier One manufacturing suppliers to research and development firms and waste management companies.

Safety veteran and OSHA expert Cindy Rupert of Ravenswood, WV, has joined the training team at Facility Results of Plymouth, MI.

-more-

“We’ve had Facility Results conduct multiple 70E trainings here,” says David Krisko, Facilities Manager for Lotus Engineering’s Ann Arbor, MI, location. “Regardless of how much we think we know when they come here to do the training, we always learn something new and useful. We use a lot of electricity, and I can think of multiple situations where things we learned from Facility Results helped us to avoid upwards of \$100,000 in unexpected downtime.”

Founded in 2009 by Bryan and Kelly Rupert, Facility Results of Plymouth, Michigan, offers an extensive collection of electrical reliability and safety solutions in the form of products, services, and training. In addition to FlashTrack™, their flagship software for performing arc flash analyses, the company offers NFPA 70E table-based label solutions, an engineer-assisted arc flash compliance program, a turnkey-engineered arc flash program, electrical system maintenance services, comprehensive NFPA 70E training programs, and workplace safety placarding and poster downloads. Facility Results has conducted over 100 training sessions across the United States on the NFPA 70E Standard as well as OSHA training, including Lockout/Tagout, Confined Space Assessment, Asbestos Standards, and more. For information on Facility Results and/or its products and services, contact the company at 888.762.0090 or email info@FacilityResults.com.
