

Built on the Basics. Powered by Technology. Driven by the Belief That Every Student Can Achieve.

At ODYSSEYWARE, we're committed to educating today's students. While we deliver courses for elementary, middle, and high school students online, we believe that a foundation built on basic skills continues to be the key to preparing students for a successful future. Although technology helps us provide interactive and engaging instruction to your students, the rigor, relevance, and effectiveness of our courses has always been our priority.

With this in mind, we've pulled together a passionate team of knowledgeable and skilled experts from relevant fields and have given them this lofty goal:

Using the latest technology, freshest ideas, effective methods, and innovative interactivity, empower students and educators with the most engaging and effective online curriculum available today.

ODYSSEYWARE's online learning environment is a result of that goal and a testament to the dedication of our team. From our founders, curriculum developers, and subject experts, to customer care specialists and education specialists in the field, our team remains committed to the beliefs on which this company was built.

- **Every student can achieve.** Keys to that achievement include a positive environment, effective tools, and loving direction.
- **Every student is unique and learns differently.** Each one deserves an individualized, enriched, and varied educational experience.
- **Every student benefits from an instructional experience and pace.** Each one needs an education appropriate to individual needs.
- **Every student must develop proficiency in the essentials.** These basics include reading, writing, math, and the critical thinking skills underlying them.
- **Every student benefits from informed guidance.** Good data and effective testing play a critical part in helping teachers make good decisions that foster student progress.

When you partner with ODYSSEYWARE, we become a part of your team, share your vision, and give you learning tools to empower your students.
