

American Heart Association (AHA) courses are now distributed online through Swank HealthCare's Learning Management System (LMS), offering clients a quick and easy way to consolidate their online training needs. Students learn cognitive skills through web-based, self-paced modules featuring interactive question/answer and video segments to reinforce learning.

Benefits of AHA's Online Training

- Offers a **consistent and effective** way to train staff on vital AHA knowledge and skills while dramatically **reducing the need for expensive classroom instruction**.
- Allows students to complete training at a **convenient** time and pace.
- **Lowers your hospital's costs** by reducing the need for additional staff to cover shifts for live training.
- **Saves resources** with no scheduling conflicts or classroom times.
- Swank's LMS **tracks your employee's AHA course completions** for you.
- **Eliminates the need for textbooks**. AHA e-learning includes all the information students need and even allows them to go back and refresh their knowledge as often as necessary for 12-24 months.

Swank HealthCare's Library of AHA Training:

- BLS for Healthcare Providers Online Part 1
- Stroke Prehospital Care Online
- Acute Stroke Online
- Heartsaver® CPR AED Online Part 1
- Heartsaver® First Aid CPR AED Online Part 1
- Heartsaver® First Aid Online Part 1
- Heartsaver® Bloodborne Pathogens Online

For courses that contain psychomotor skills such as CPR, students must complete an in-person skills session in addition to online learning. A skills session is comprised of Part 2, skills practice, and Part 3, skills testing. This three-part delivery effectively blends cognitive learning with skills training. Visit www.swankhealth.com for the most convenient skills session location.

Swank HealthCare offers an extensive CE/CME course library of over 500 courses in 18 disciplines – we are committed to continuously add course content that will help you and your staff provide the best possible care to your patients.
