**Opteamix LLC strengthens security for customer data: Gets ISO 27001 certified.**

**Certification marks significant step forward in the company's vision to provide excellence through process optimization and people partnership to its clients.**

Opteamix India Business Solution India Pvt. Ltd, a wholly owned subsidiary of Opteamix LLC., ([www.opteamix.com](http://www.opteamix.com)) a Denver based IT Services company announced today that it has been certified for ISO 27001:2005(International standard for an information security management system (ISMS)) from the ISO accredited certification body BSI. Opteamix started its India operations in June by forging a partnership with Tekizen private limited.

Tony Hadzi, the CEO of Opteamix stated, *"The last 8 months have seen tremendous growth for Opteamix. Being a young IT company, getting ISO 27001 certified demonstrates exceptional dedication towards securing clients' data and our commitment to build customer relationships based on partnership, respect and trust. This Certification will be a great assurance to our customers and prospects who regularly ask us questions about how we protect information; we are now able to give a very clear answer to those questions."*

ISO (International Organisation for Standardisation) is the world's largest developer and publisher of international standards and ISO 27001 is the international standard for information security management system (ISMS). ISO 27001 specifies the requirements for a business to establish, implement, review, monitor, manage and maintain an effective information security management system. The certification means that a Company has been independently certified and awarded the internationally recognized highest information security standard.

The assessment for the certification was conducted by BSI group (A leading global provider of standards, management systems, business improvement and regulatory approval information) and the auditing team was led by Ravindra, General Manager- IT, ITES Certifications. According to Ravindra *"Very few organizations of this size have been able to achieve this milestone and in such a short time"*

The standard has been awarded to Opteamix following a rigorous two step auditing process and eight months of preparation. The company has put various policies and procedures in place, which cover all information, assets and employees. This enables

Opteamix to manage confidential and sensitive corporate information that it is available, confidential and has its integrity intact.

*"I am delighted that we have achieved ISO 27001 certification from BSI" says Shrinivas Ramanujan (Rama), the VP of Delivery for Opteamix who spearheaded the initiative "This certification represents independent confirmation of our security process and demonstrates to our customers that we take the security of their data extremely seriously. We want to implement this discipline from day one within our organization and foster a "security culture" within Opteamix."*

## **A B O U T O P T E A M I X**
