

Business Advisory - Technology Services

SMART DEVINE is a diverse team of business consulting professionals that offers a comprehensive foundation of expertise and practical, informed advice. By combining the most attractive features of both larger and smaller firms, SMART DEVINE has set an innovative new standard for service that provides lasting value to our clients. Our multi-disciplined team of business consulting and management advisory professionals offers practical, informed advice that is both responsive and cost-effective. We believe high quality work and personalized service differentiates us from other firms. This approach has produced extraordinary results. By providing superior services at reasonable rates, we have attracted many clients who are disenchanted with large, global firms. Our client list ranges from large multi-national companies to a variety of smaller, regional companies.

SMART DEVINE brings you the extensive experience and deep understanding you require in selecting a business advisor and long term partner. Our proven track record across several industries combined with specialized technology and accounting knowledge allows us to offer an unequalled comprehensive approach. Our experienced advisory team can deliver services that meet your needs, drive your business goals and help enhance your competitiveness.

Business Advisory - Technology Offerings

Strategic Technology Leadership

Are you ready for the cloud? Do your IT projects support the business strategy? We provide experienced technology leaders on a fractional basis to assist clients in leading their technology and translating “tech jargon” to business terms and concepts.

Operational Assessment

Are you getting the most from your existing software solutions? Are you concerned about the efficiency or controls around manual or excel based processes? We will work with you on critical operational and/or financial processes , performing an end to end review and providing recommendations for improvement.

Technology Environment Assessment

Is your business continuity plan up to date or even feasible? Are your IT resources being used responsibly and risks being managed appropriately? SMART DEVINE's comprehensive technology assessment focuses on all aspects of an organization's IT resources with multiple offerings to meet your timelines and budget.

Project Management

Not enough resources to manage a project? SMART DEVINE can provide a range assistance on projects large and small to help put a realistic project governance structure in place to inform stakeholders and manage success. Our approach focuses on establishing a plan and a process for managing a project that helps to mitigate risk by promoting constant communication, quickly facilitating issue resolution, ensuring quality and accuracy, and establishing checkpoints to evaluate the project's progress.

Software Evaluation & Selection

Ready to replace a critical software component within your business? Want to make sure you have considered all options and can differentiate sales talk from reality? Our team's experiences as users, implementers and software vendors combined with our proven approach provide a unique experience to guide you through the decision process.

Systems Implementation Services

Implementing a new application? SMART DEVINE professionals have extensive experience implementing and providing post-live support for many applications across several industries. Our methodology is tested and proven through many years of professional experience.

Business Intelligence & Reporting

Do you need to get better data and analysis out of your existing system? Are you leveraging your existing reporting tools effectively? SMART DEVINE professionals can assist with implementing , designing and optimizing reporting, analytics and business intelligence solutions. We have experience with the leading tools from Microsoft, Business Objects, Cognos and other niche providers . We understand the applications and business processes that provide the data allowing us to provide more value than just a technical resource.

Smart Devine provides a full range of accounting, advisory, tax and investigative forensic and litigation services to organizations across a variety of industries.
