

WAKEFIELD-VETTE ANNOUNCES CONSOLIDATED OPERATIONS WITH A NEW NAME AND LOGO

PELHAM, New Hampshire (USA), — September 6, 2012 — The merger of our two companies, Wakefield and Vette Corp into a single entity, Wakefield-Vette, is being completed. We are consolidating operations, sales and management into a single new company named Wakefield-Vette. Each company brings complementary skills and capabilities, unique customer applications, and thermal know-how that combine to make us unique in our industry.

Our new company and name is expressed through our logo. It is the graphic representation of our brand.

Our logo combines two recognized thermal industry leaders with their extensive skills and capabilities into one expanded company, a new force in the industry, a synergistic pairing of Wakefield and Vette Corp with Wakefield-Vette bigger and more significant than simply the sum of its parts. Wakefield-Vette is new and brings a bright promise.

The signature mark, the red arc affirms that Wakefield-Vette is a complete, end-to-end thermal solutions company -- end-to-end engineering, end-to-end manufacturing from raw aluminum extrusion to finished thermal products, end-to-end global presence and end-to-end service and support for our customers.

We will make continuing announcements over the next several weeks as we launch new customer service and support initiatives. Sign up, sign in and watch for Wakefield-Vette news and updates via our website -- wakefield-vette.com, Twitter -- @wakefieldvette and YouTube -- wakefieldvette.

“It is a new and exciting time for the entire Wakefield-Vette team and a promising time for the customers we serve. Our commitment is to work tirelessly to be the world’s leader in the thermal solutions industry, to reliably and dependably deliver for our customers -- innovative, cost-effective thermal solutions, anywhere around the globe,” - **Kevin Kreger, President, Wakefield-Vette.**

About Wakefield-Vette
