

ANYWHERE POINT OF CARE IT'S THAT EASY

MOBILECARE™

MobileCare harnesses the power of unified communications to access vital patient information anytime, anywhere and work with other medical staff for effective patient care. MobileCare enables physicians and clinicians to minimize the need for pagers or proprietary devices .

MobileCare also helps new users to utilize the smart devices they already carry and know. MobileCare provides access to whatever they need with a single point of entry and supports patient care remotely no matter where the patient is.

MobileCare improves communication and collaboration across the diagnostic and treatment continuum for improved workflow, higher productivity, better care for less cost, more informed decisions, and better patient outcomes.

BENEFITS OF MOBILECARE

- Faster decision making and care by accessing vital patient information anytime, anywhere
- Accelerate fulfillment of Meaningful Use (MU) Requirements
- Enhance reimbursement potential through meeting MU and Accountable Care Organization standards
- Reduce Hospital Communication, Paging and Integration Expenses
- Improve Risk Management Support through Automated Tracking

MobileCare combines unified communications with patient information access to healthcare professionals for improved patient treatment

COMMUNICATIONS

- Paging

- Information Sharing
- Prescriptions
- Labs and Radiology
- Clinical Notes
- Patient Handoff
- Referrals

NOTIFICATIONS AND ALERTS

- Lab, Pathology, Radiology & All Clinical Results
- Clinical Alerts
- Real-time Monitoring
- Outcomes Reporting

TECHNOLOGY

- Seamless Integration with HIS Systems
- HIPAA Compliant
- Specialty-specific UI
- iOS, Blackberry & Android Platforms

MOBILECARE

EASY BECAUSE IT'S PERSONAL

MobileCare works with the Smartphones, PDAs and Touchpads already being used on a daily basis by healthcare staff. This eliminates the expense, IT support and learning curve associated with adding new technology .

- Consolidate devices (pagers, cell phones, and PDAs), and fax, e-mail, calendar, and phone through one application to allow staff the freedom to work smarter.
- Between appointments, at home, or on the go – learn, communicate, and take action in real time.
- Access diverse HIT systems and input information with one device.
- Customize for medical specialties, such as Emergency Department, Cardiology, Oncology and others
