

# XVC Dual-Vision™

A Compact, Low Cost,  
*Continuous*  
Video Recording Solution

VisionSystems

A Century of  
Automotive Vision Safety

Accountability is smart business. . .  
*"You can't manage what you can't see."*

**Dual-Vision™ XC assists Fleet Managers by:**

- Reducing distracted driving
- Improving driver performance with real-time driver feedback
- Protecting the bottom line by:
  - Reducing fuel consumption
  - Stopping potentially dangerous driving habits before they lead to accidents
  - Reducing liability and insurance premiums

**NEW  
COMPACT  
DESIGN!**

**PRODUCT DETAIL KEY**

1 - SD Card Port	5 - Built-In Speaker	9 - Infrared Lights
2 - Event Release Button	6 - SD Card Security Lock	10 - Built-In Microphone
3 - Emergency (Event) Record Button	7 - Display Window	11 - GPS Module/Mount
4 - Windshield Mount Push Lock	8 - Rear Facing Camera	12 - Front Facing Camera

- Product Highlights:**
- 160+ hours of continuous video recording
  - No monthly fees
  - Two cameras in a single enclosure for both interior and exterior viewing
  - G-force, panic, speed event recording and tagging
  - Self-managed data stored on a removable SD card
  - Integrated GPS tracking
  - SD card security lock
  - Windshield mount push lock
  - Video and audio easily converted to .avi file
  - Stores an event with before-and-after video in a separate folder
  - Timer for 24-hour surveillance of vehicle
  - Infrared LEDs for night recording
  - Easy installation
  - And much more...

**Continuous Video Recording  
"Prevent the Event"**

The Rosco Dual-Vision™ XC continuous dual video recording system provides all the benefits of event based recording with the added benefits of continuous recording. This enables fleets to review video of driver behavior to identify risky actions before an event occurs. The result . . . a proactive "Prevent the Event" approach to safety which reduces the risk of catastrophic accidents far beyond "event only" type recording devices or standard mobile DVR systems with minimal event or driver feedback capabilities.

**Instant Driver Feedback and Training**

Dual-Vision™ XC continuously monitors and captures driving behavior while simultaneously providing real-time driver feedback. If predetermined speed limit and or G-force settings should be exceeded, the driver is notified with an audible chime. The audible chime or "alert" is a reminder to drivers that helps reinforce safe driving habits. Dual-Vision's™ continuous video helps fleets monitor and confirm that safe practices are consistently maintained by drivers. Dual-Vision's™ instant driver feedback is the equivalent of a safety expert sitting side by side with drivers and training them on safe practices that result in behavioral changes and fewer accidents.

**Comply with New Federal Laws**

Dual-Vision™ assists fleet managers to comply with federal law that bans all commercial drivers from using hand-held devices. Drivers who violate the restriction can face federal civil penalties of up to \$2,750 for each offense and disqualification from operating a commercial motor vehicle for multiple offenses. Commercial truck and bus companies that allow their drivers to use handheld cell phones while driving can face a maximum penalty of \$11,000.

**No Monthly Fees!**  
 Dual-Vision™ increases a fleet's productivity & profitability by improving driver performance at a fraction of the cost of event only, Wi-Fi, & DVR recording technologies.

Dual-Vision™ XC Player & GPS Location via Google Maps

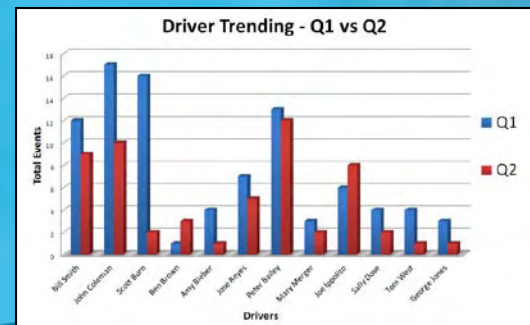

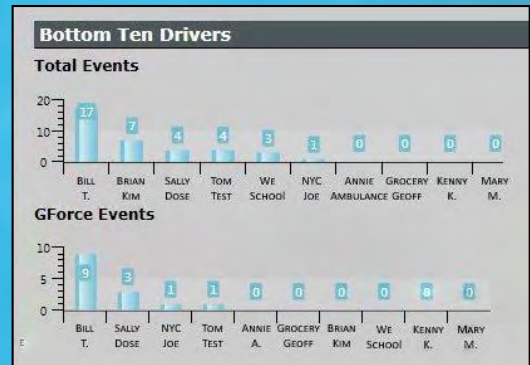

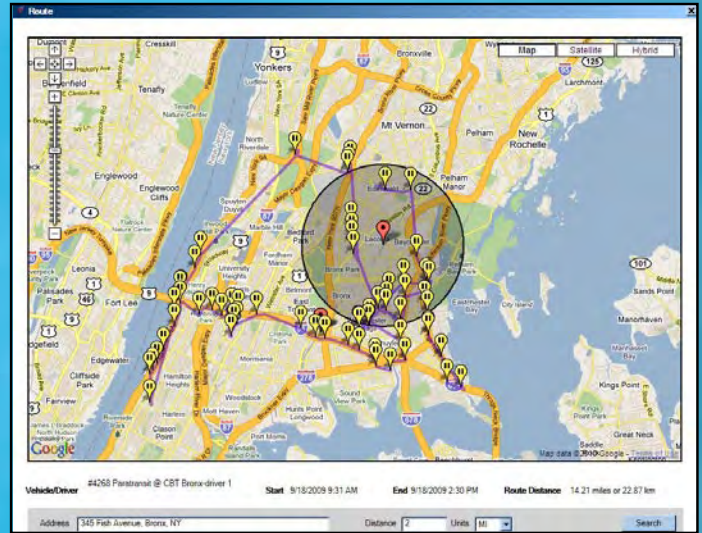

# Optional DV-Pro™

## Fleet Management Software

DV-Pro™ is fleet management system software that helps you manage Dual-Vision™ video recordings and data. Use the software to archive footage by driver, by vehicle, and by descriptive tags you use to highlight video segments of interest. Post-route GPS tracker data is easily accessed to help you evaluate location, routing, and speed. Data may be exported into Microsoft Excel spreadsheets to create driver safety and trending reports.

- Instantaneous reading of SD card files, total events, and types of events such as:
  - G-Force
  - Panic/Marker button
  - Speed overages
- Downloading of all or specific events based on date, driver, vehicle #, etc.
- Archives & organizes data to allow for queries & searches by any number of descriptive vehicle or driver criteria
- Excel reports on driver safety and or vehicle profiles can be created with ease
- Google mapping of GPS location & routing of vehicle travel history, street and address searches
- Playback video with specific indicators as to where events like G-force & speed occurred
- Create easy to e-mail standard format .avi video files

NO MONTHLY OR ANNUAL FEES & NO SETUP COST
