

VideoCharge Your Teleconferences!

Multi-point video conferencing is not just for the big guys anymore.

You don't need to invest in an expensive telepresence system, purchase video conferencing bridges or expose your bridge credentials to third-parties to have a high-quality video conference with your sales team, customers or partners. SimpleSignal provides unlimited, full-featured HD-quality audio and video conferencing for three or more attendees right on your Polycom video desk phone, computer or mobile device. Now enjoy face-to-face meetings without the need to travel, while saving time and money.

The Problem

- You want more than point-to-point video conferencing but don't want to buy an expensive bridge. Or you have a bridge but don't want to expose your bridge credentials to third parties.
- Multi-point video conferencing solutions such as Skype exist online but do not offer the quality appropriate for business video conferences.

Our Cloud-Based Solution

SimpleSignal's Multi-Point Video Conferencing service is a cost-effective, hosted solution. Secure co-location facilities and network management are maintained so you don't have to. We enable ad hoc inter-enterprise video conferencing in a secure environment, maintaining video conferencing behind your firewall. Now you can easily and securely allow remote salespeople, customers, executives or partners to join your video conferences.

Features and Benefits

- Instant 3-way (or more) high-quality video conferencing without spending thousands
- Flexibility, reliability, and ultimate scalability
- Works on Polycom video phones, computers, iPhones, iPads, and Android devices!
- Polycom UltimateHD™ technology – high-definition business-grade video and audio

SimpleSignal has taken out the complexity and expense of multi-way video conferencing so you can simply pick up your video phone and dial into a video bridge whenever you want.
