

BASWARE E-INVOICE VIRTUAL PRINTER

Easiest e-invoicing in the world

Sending e-invoices is incredibly easy. With Basware e-Invoice Virtual Printer you can send e-invoices simply by pressing the print button. Basware will take care of the rest.

If you think that sending e-invoices is difficult or expensive - think again. With Basware e-Invoice Virtual Printer, you simply print e-invoices the same way you would paper invoices, without changing your invoicing processes or software. Since there are no paper, printing or postage costs involved, you save costs on every e-invoice you send.

Easy to get started

Basware e-Invoice Virtual Printer is best suited and most cost-effective for companies with relatively small invoice volumes. You can create invoices using any program, print them virtually to Basware and we'll send them - along with any attachments - to your customers as e-invoices. To get started, all you need to do is install a small software client on your computer or server that allows you to communicate with our e-invoicing service, and you'll be sending e-invoices in no time.

Easy to use

We make it simple to send your invoices as e-invoices. All you have to do is add your customer's e-invoicing address to the invoice and hit the print button. We'll do the rest. We'll be taking care of data validation, format conversions, legal compliance and, if needed, a digital signature on your behalf. We'll convert your invoices into e-invoices and send them directly into customers' invoice processing systems via the Open Network, the world's largest open e-invoicing network. Our e-invoicing service is fully compliant in more than 50 countries.

Cost Savings, Faster Access to Cash, Greater Visibility

By using Basware e-Invoice Virtual Printer, you'll not only be able to meet your customers' requirements for e-invoicing, but you'll also gain many business benefits. In addition to the cost savings you'll receive by sending e-invoices directly to your customers' invoicing systems, you'll also expedite the invoicing and payment process - potentially giving you faster access to cash and improving your cash flow. You'll also gain the visibility to track the status of your invoices anywhere, anytime with a browser using Basware Transactions Monitor, which monitors the transfer and conversion of e-invoices. As added benefits, by reducing paper from your process, you'll increase efficiency and sustainability.

Basware e-Invoice Virtual Printer is reliable and secure. We monitor all of our hardware, software and telecommunications connections 24/7.

Proven solution

More than 7,000 customers are sending 4.5 million e-invoices annually using Basware e-Invoice Virtual Printer.

E-Invoicing Your Way

Basware gives companies a variety of options for sending e-invoices - enabling them to start small and scale up as their businesses grow. We also have packages to meet even the most complex e-invoicing needs of larger organizations and enterprises. Our packages include:

Basware e-Invoice Email is the fastest way to start sending e-invoices. Just email your invoices to Basware as PDF attachments. We'll turn them into e-invoices and send them to your recipients via the Open Network.

Basware e-Invoice Virtual Printer is an easy to use and scalable solution for small and medium- sized businesses. Print your invoices virtually to Basware and we'll turn them into e-invoices and send them directly to your customers' invoice processing systems.

Basware e-Invoice Basic is the first fully integrated solution. Send your invoice data to us directly from your invoicing software and we will send the e-invoices for you. Your customers can either receive e-invoices directly into their invoice processing systems or via email.

Basware e-Invoice Pro is a cost-efficient solution for companies that want to achieve 100% e-invoicing and go paperless from day one. Send all invoices to us and we'll take care of sending them as e-invoices or via e-mail. We also provide printing and mail service for those invoices that cannot be sent electronically.

Basware e-Invoice Premium is for companies with demanding needs. It includes all the capabilities of the previous packages, and furthers your ability to send 100% e-invoices by bringing your customers on board. Send all invoices to us in any format. We'll create your e-invoice layout according to your requirements. Our activation services will help your customers to begin receiving e-invoices quickly and easily - driving down costs on your behalf.

What is an e-invoice?

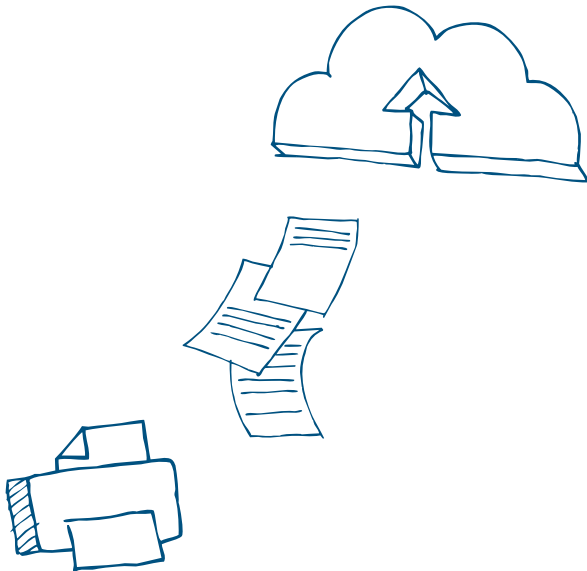

An invoice that is sent and/or received electronically and used to automate invoice processing.

It always includes invoice data, an invoice image, and is a legal document.

It is not just an emailed PDF, a scanned version of a paper invoice, a faxed invoice, or an EDI or XML data file.

The Open Network

The Open Network is interoperable, enabling companies to easily and cost-effectively send and receive e-invoices with their trading partners globally - all through a single connection. It eliminates the costly and limited nature of traditional closed networks, and enables companies to gain the efficiencies, visibility and other benefits that e-invoicing delivers. This largest open network of its kind currently has more than 140 e-invoice operators on the network, connecting hundreds of thousands of companies globally.

Basware is the global leader in cloud based e-invoicing and purchase-to-pay solutions with more than 1,000,000 users in over 60 countries. Basware's B2B Cloud solutions and services provide an open, secure and global ecosystem for buyer and supplier collaboration, connecting more than 1.9 million buyers and suppliers globally. The solutions are architected to meet the needs of SMEs and global enterprises and are built upon Basware's deep knowledge and experience of B2B financial processes, coupled with intelligent cloud connectivity and the Open Network.

With Basware, organizations benefit from more efficient procurement, accounts payable and accounts receivable processes, sustainable cost savings, better insight to cash flows and improved buyer-supplier relationships. The solutions are available via the cloud, on-premise or through business process outsourcing in Europe, the US, and Asia-Pacific through an extensive network of Basware offices and business partners.
