Symfony Live San Francisco 2012 :
the 2nd SensioLabs "US rendez-vous"

On September 26-29th 2012, the 2nd edition of the Symfony Live San Francisco takes place in the prestigious Microsoft offices. Around the Symfony Core Team and SensioLabs experts, this event represents an outstanding opportunity to share knowledge and ideas about the framework with the whole Symfony community.

San Francisco, **September xxth 2012** – SensioLabs, *créateur de Symfony*, is proud to announce the Symfony Live San Francisco 2012 which takes place on September 26th-29th in Microsoft offices downtown San Francisco, CA. Two days of conferences, a training day, a free *hacking day* and a Symfony Certification Exam: don't miss this great event dedicated to the Symfony framework and its international community!

Symfony Live San Francisco 2012 : the place to be
For the second consecutive year, the Symfony Live takes place in San Francisco, CA, hosting meetings, experience sharing and feedbacks on Symfony during four days.

Around the *Core Team*, and in particular Fabien Potencier, creator and lead developer of the framework, more than ten renowned professionals will share their experiences and knowledge about the Open Source framework. On Thursday 27th and Friday 28th, a dozen of conferences will be held about Symfony, its components, its uses and developments.

For this 2nd edition, about 200 attendees are expected: developers, project managers, CTOs... Every member of the PHP community is invited to join in the event to share and extend their know-how on Symfony.

A training day to enhance the use of Symfony
Besides, SensioLabs experts will also lead a training day, on Wednesday 26th, to learn more about the Symfony features set with advanced tools like caching, security and dependency injection management.

Symfony Certification Exam to assert your skills
On Saturday 29th, the *hacking day* will bring the most experienced developers together to work on common Symfony projects. Moreover, SensioLabs organizes a Symfony Certification Exam. In 90 min and 75 questions, developers will have the opportunity to validate their experience and demonstrate their skills on Symfony.
Exclusively issued by SensioLabs, this certification lets developers assert their skills and increase their legitimacy and credibility.

About SensioLabs

SensioLabs is an Open Source solutions editor, dedicated to the design and the development of web applications. Designer of the Symfony framework – leader of PHP industrialization tools – of the micro-framework Silex and of the templating engine Twig, SensioLabs puts pragmatism at the heart of its solutions: its products and services are designed to minimize technical constraints and enhance business challenges of web projects.

Founded in 1998 by Fabien Potencier and Grégory Pascal, SensioLabs put innovation at the core of its philosophy: supported by strong international communities surrounding its Open Source tools, SensioLabs spends 10% of its annual turnover to research and development. Eligible for research tax credit (CIR), SensioLabs is approved by the French Ministry of Research and OSEO. http://sensiolabs.com/
