

BENEFITS

- **ADVANCED DOCUMENT MANAGEMENT**
Cloud-based central repository to control and manage documents, media and other content from start to finish. Share important information with others while ensuring the latest versions are always at hand.
- **ENTERPRISE COLLABORATION**
Advanced set of messaging, voice and collaboration tools that facilitate teams working together on projects, documents, tasks, activities, training and much more.
- **ANYWHERE, ANYTIME, ANY DEVICE**
Access company, client and project information from any location across a wide variety of desktop, laptop, tablet or mobile devices.
- **SPEED TO VALUE**
Pre-configured solution to get you up and running fast! Simply log in and begin loading your key client and project information.

ServicePoint365 is a cloud-based Software-as-a-Service (SaaS) application designed to maximize the collaboration and content management capabilities of Microsoft Office 365 specifically for **Professional Services** organizations. The solution consists of a number of "Centers" that are preconfigured to help companies better organize, collaborate and manage their client, project and resource related information.

ServicePoint365 leverages Microsoft Office 365's (SharePoint Online, Exchange Online, Lync Online)

applications to create a robust environment organizations can subscribe to and begin using with minimal configuration. The number of subscription seats can easily be expanded or reduced as business needs change while supporting access across a wide variety of desktop, laptop, tablet and mobile devices.

ServicePoint365 Centers:

- Company Center
- Client Center
- Project Center
- Staffing Center
- Sales Center
- Solution Center
- Delivery Center
- Knowledge Center
- Resource Center
- Partner Center
