

VERSATILE FLUID ENGINEERING

seepex.com
all things flow

Since our foundation in 1983, DPS have become established as a major supplier for leading manufacturers of high quality pumping equipment.

You can be confident that we will Design, Supply, Install and Commission the perfect system for your needs. We offer control, pumping, mixing and environmental solutions, turnkey projects, agricultural systems and our online remote monitoring facility.

Design

The experience of our staff gives us the ability to take a clients' application from initial concept and to design the solution best suited to their technical and commercial requirements. We also offer a varied range of our in-house designed products:

- **Agricultural projects**
- **Drainage applications**
- **Dust suppression/road sprays**
- **Hydraulic system analysis**
- **Irrigation**
- **Pressure boosting**
- **Pumping stations**
- **Rainwater harvesting**
- **Remote telemetry equipment**
- **Treatment systems**
- **Turnkey projects**

Sales

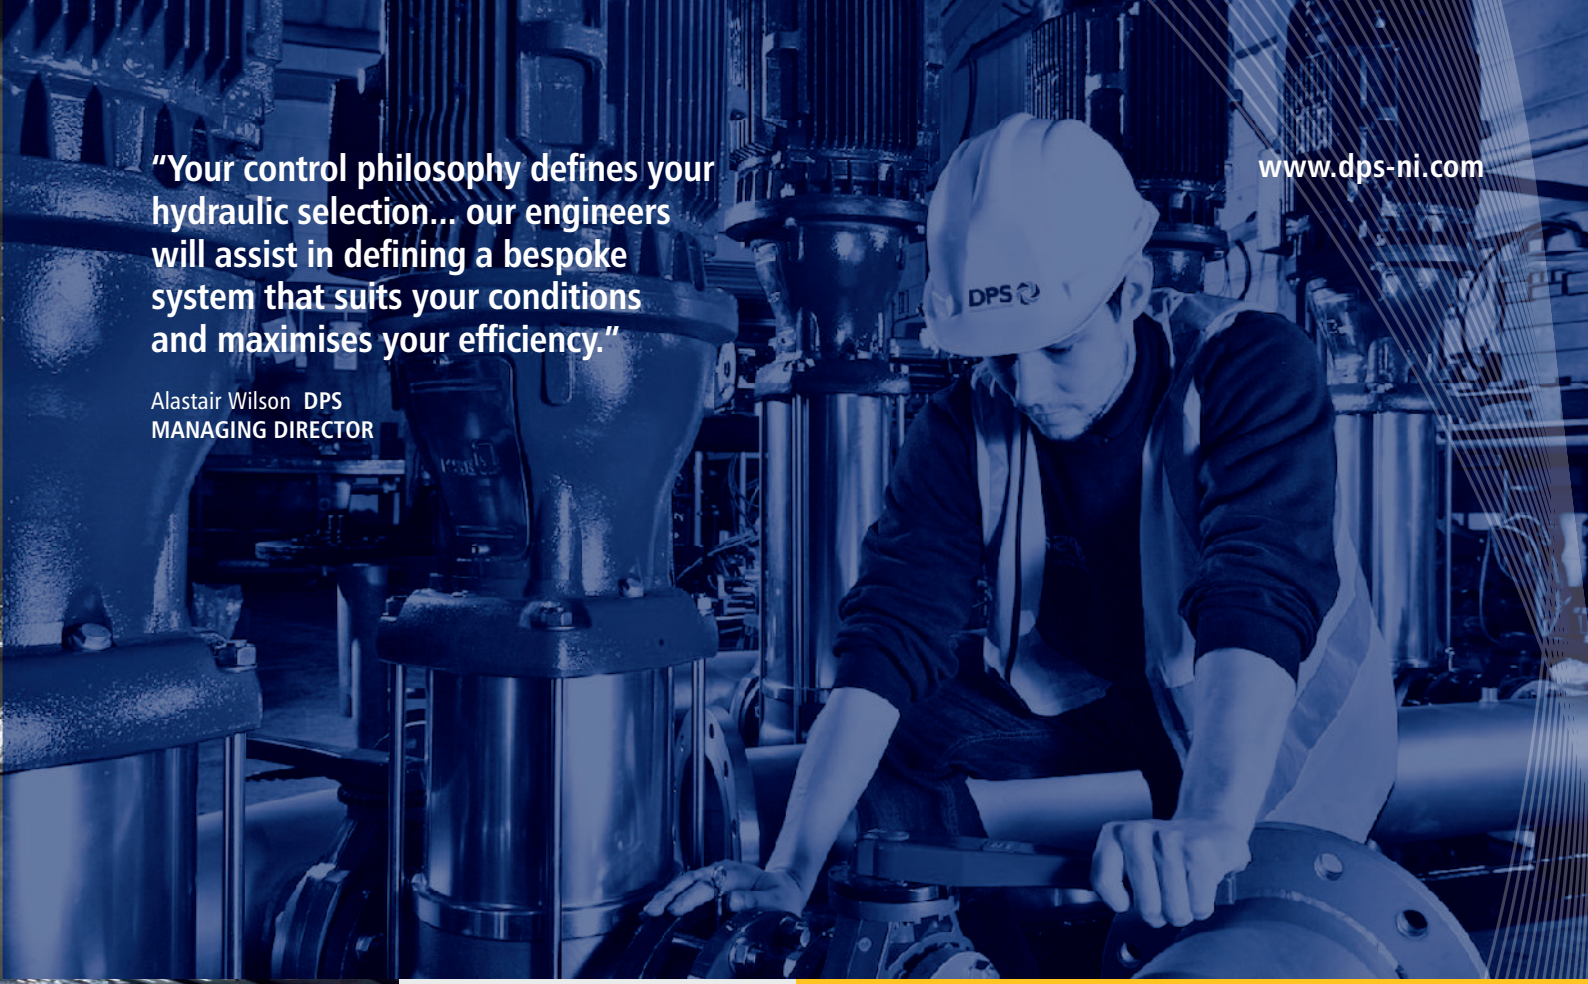

Testament to the success of DPS is our continued presence as one of Irelands' leading fluid engineering companies. Throughout our time we have developed a reputation for excellence across a range of industry sectors:

- **Agricultural**
- **Commercial**
- **Construction**
- **Food and drink**
- **Industrial**
- **Municipal**
- **Residential**

"Your control philosophy defines your hydraulic selection... our engineers will assist in defining a bespoke system that suits your conditions and maximises your efficiency."

Alastair Wilson DPS
MANAGING DIRECTOR

www.dps-ni.com

"The DPS team of technical engineers were available immediately over the telephone, with clear explanations and advice."

G LYNCH O'KANE POULTRY

We are Ireland's sole distributor for KSB, NORTECH, and LANDIA equipment. We are also distributors for DAB, EBARA, SEEPEX, FRISTAM, ANUA, HALCO ROCK TOOLS, HYDRODIFF, OASE, ATG WILLAND, HUNTER and FILEDER.

Please visit www.dps-ni.com to find out more about the range of products and services we provide.

"To maximise the throughput of our butter packaging machine, we required 3 tonnes per hour at 35Bar and the FRISTAM FKL lobe pump supplied by DPS certainly delivers."

Production Manager, Dairy Industry

Service

Excellent service is essential to safeguard the longevity of your pumping equipment. The DPS policy is to prevent problems before they occur, reducing unnecessary downtime.

Our range of service packages to support your application includes:

- **After sales support**
- **Bespoke fabrication**
- **Consultancy**
- **Emergency repairs**
- **Maintenance contracts**
- **Online monitoring**
- **On-site repairs**
- **Spare parts**
- **Workshop repairs**

Sewage pump station

Leachate storage

24/7/365

DPS Service & Support team are committed to you 24hrs a day, 7days a week, 365days a year.

We have maintenance packages on offer that can be tailored to your exact requirements, providing everything from simple repairs and spare parts, right through to year-round service contracts and remote monitoring.

"The Versatile Dairy System developed along with United Tankcare's plate heat exchangers, results in a temperature reduction of up to 25°C before entering the bulk tank, reducing the milk cooling energy costs by up to 80%."

Irwin Arrell UNITED TANKCARE

Product Support

By offering a local holding of over £250k of spare parts, means our engineers can perform on-site repairs at rapid response times. We also offer a collection and return service for workshop repairs.

- **Emergency call outs**
- **Guaranteed response times**
- **Planned preventative maintenance**
- **Reactive maintenance**
- **Specialist service**

Booster set

Storage screens

As a company we are committed to our customers. This is evident in our proactive approach to managing client's requirements throughout the entire project. Our dedicated Sales and Service Team manage each project from initial enquiry through to After-Sales service and continuing product support.

Installation

Installing the right pump in the right system requires the right personnel. Our Service Team is among the most experienced in Ireland. Having served our client base for more than 25 years, our team of skilled service engineers have over 100 years combined experience. This knowledge and understanding enables us to install pumps and associated ancillaries across a wide range of industries and applications:

Waste water Brewery and Beverage **Biogas**
Facilities Management Fire protection
Waste supply **Sewage** Pharmaceutical
Landfill Remediation **Pumping stations**
Water treatment Chemical **Slurry** Marine
Dairy food **Sports and Recreation** Heating and Ventilation

www.dps-ni.com

"Our products are designed and installed in the most adverse conditions throughout Ireland."

"From 1 litre per hour to thousands of litres per second with pressures of up to 250bar our team of pump experts can provide a solution for your application."

Technical Support

DPS's team of experienced technical engineers can assist in real time diagnosis and resolution of system problems or faults:

- **Borehole camera survey**
- **Control panel supply & commissioning**
- **Electricians**
- **Fault diagnosis**
- **Fluid hydraulic design**
- **Inspection of existing systems**
- **Mechanical fitters**
- **Remote telemetry system**
- **System analysis**
- **Technical engineers**

The Local Base for Fluid Engineering

- Borehole pumping equipment
- Borehole camera surveys
- Control systems
- Circulating pumps, pressure sets & submersibles
- Decorative fountain systems
- Stainless steel submersible & surface mounted pumps
- Engine pumps and generators
- Filtration systems
- Positive displacement & centrifugal hygienic pumps
- Irrigation equipment and systems
- Submersible and industrial pumps
- Mechanical and electrical fittings
- Mixing and aeration solutions
- Packaged Sewage stations
- Pipe and Cable mole ploughing
- Ranges of AOD, dosing & peristaltic pumps
- Remote telemetry system
- Rock drilling equipment
- Progressive cavity pumps & macerators
- Sewage pumping
- Sewage treatment plants
- Sports ground Irrigation systems
- Ultra violet disinfection

VERSATILE WATER SYSTEMS

- Versatile wheel wash
- Versatile dirty water irrigation
- Versatile dust suppression systems
- Versatile booster set

Our range of products, skills and services includes design, specification, sales, installation, after sales and on-site/workshop servicing & maintenance.
