[ABOUT THE SPORT] Drifting is the act of maneuvering a vehicle through corners at speeds and angles that exceed the vehicle's grip. A drift is when a driver performs a controlled slide through corners while adhering to the racing line. Drifting involves fast cars, super skilled drivers and hardcore fans.

It's a combination of driving skill, style and showmanship. It's all about loss of the rear wheel traction while keeping the race car in total control. Drifting is so popular because it brings all the best aspects of motor sports into one package. Highly skilled drivers control a high powered street car past its limit, sideways at high speed, burning rubber. It can't get any better!
