Oxygen Software Participates in HTCIA-2012, Showcases Rugged Forensic Kit

Oxygen participated in the 2012 HTCIA International Conference & Training Expo. More than 1,000 visitors stopped by Oxygen's booth. The company showcased its Rugged Oxygen Forensic Kit for field investigations, closed a number of deals with clients and partners from all over the world, spoke about the latest trends in mobile forensics, and held a silent auction for Oxygen Forensic Suite 2012 (Analyst).

Oxygen at HTCIA 2012

Oxygen Software had tremendous success participating in the 2012 HTCIA International Conference & Training Expo held September 16-19 in Hershey, PA. With more than 1,000 visitors stopping by Oxygen's booth, the company was able to close numerous deals and make valuable partnerships with companies from all over the world. The company's forensic specialists spoke about the latest trends in mobile forensics, giving a lecture on challenges and issues in obtaining and analyzing full communication information from mobile devices for use in criminal investigations.

Rugged Oxygen Forensic Kit

Oxygen Forensic Kit is a suite of tools that helps to acquire necessary evidence from seized devices without wasting time on PC configuring, finding cables and suitable drivers. With Oxygen Forensic Kit no additional expenses on different hardware or software products are required.

Oxygen showcased a new edition of its proven Forensic Kit, adding the required ruggedness for those using the kit in the field. Rugged Oxygen Forensic Kit makes field investigations easier by putting the already perfect kit in a rugged, shock- and waterproof case. By delivering the rugged edition its best-selling, all-in-one kit, Oxygen is targeting field intelligence specialists, special police forces and the military.

About HTCIA-2012

The 2012 HTCIA International Conference & Training Expo was held September 16-19, at the Hershey Lodge in Hershey, PA. The HTCIA conference is the premier event for those in law enforcement or private industry who investigate high technology crime, allowing forensic workers to re-connect with colleagues, network with peers, exchange best practices and preview technology and services from leading providers in the industry.

About Oxygen Forensic Suite 2012

Oxygen Forensic Suite 2012 helps investigators and forensic specialists access and analyze data from a variety of mobile devices such as cell phones, smartphones, communicators, PDA and tablet PCs. Currently supporting more than 6,500 different models, Oxygen Forensic Suite 2012 covers the widest range of mobile devices compared to competition, and allows fully automated acquisition and analysis of supported devices.

The unique Timeline feature offers convenient, single-place access to all activities and movements performed by the user arranged by date and time. Investigators can track user location at every moment, build and map their historic routes, and clearly see all activities performed by the user at each location.

Another signature feature of Oxygen Forensic Suite allows investigators performing a global search on all devices ever analyzed with the toolkit. The global search quickly reveals any connections (e.g. common contacts, exchanged calls, texts or emails) between the phone owners.

Oxygen's statistical analysis tools allow investigators discover social connections between the users of multiple mobile devices. Calls, text messages and Skype conversations are analyzed to produce charts and tables revealing the users' closest circle at a glance.

Oxygen Forensic Suite 2012 guarantees zero-footprint operation, leaving no traces and making no modifications to the content of the devices, making it the tool of choice among government and law enforcement agencies, security services and forensic organizations in more than fifty countries.

About Oxygen Software

Founded in 2000, Oxygen Software offers the most advanced forensic data examination tools for smartphones and mobile devices. The company is dedicated in delivering the most universal forensic solution covering the widest range of mobile devices running Symbian, Windows Mobile, Blackberry, iOS, and Android operating systems. As a result, Oxygen Forensic Suite receives great response at forensic conferences, exhibitions and trainings, and occupies a spot in the top of the list in relevant tests for extracting more data than competition.
