Digiscribe New England Wins Fourth Major Hospital Account in Six Months
Medical Facilities Increasingly Utilizing Digiscribe's Financial Document Management Solution

Norwood, Massachusetts – September 28, 2012 – [Digiscribe New England](#) today announces that their business development team has just won their fourth major hospital client in six months. With a payback period typically measured in six months or less, hospitals, clinics and medical centers throughout Boston, Massachusetts and New England are increasingly recognizing cost savings and efficiencies from Digiscribe's [financial document management solutions](#) so that they can focus more on patient care and less on shuffling paperwork.

While scanning patient charts and records for use with electronic medical/health records (EMR/EHR) systems is also a Digiscribe solution that has gotten a lot of attention, Digiscribe's healthcare financial document management solution helps to streamline accounts payable (AP) and accounts receivable (AR) departments. There are two main aspects of this solution: [document scanning services](#) and [cloud document management](#).

Document scanning allows hospitals to outsource the labor-intensive task of document preparation, scanning, indexing, exception handling, and quality control. Cloud document management allows for instant and secure access to purchase orders, vendor invoices, medical claims, patient invoices, contracts, and any other business document—anytime, anywhere and for a modest monthly fee versus a capital expense.

"Hospitals are much better at treating patients than scanning documents and hunting for records in filing cabinets," said [Tom Zelif](#), co-owner of Digiscribe New England. "Whether you're scanning AP and AR records today or not, and whether you need them uploaded to your current EMR/EHR, practice management system or a new document management system, we can help relieve your pain. This is our specialty." Zelif went on to say, "Because our solutions offer a positive return on investment in just a few months, many of our medical clients are now considering taking the next step with workflow automation to ensure that payments are received faster and any AP or AR processing bottlenecks are promptly identified and resolved."

About Digiscribe New England

Digiscribe New England implements cost-effective document scanning and document management services that help companies, non-profit organizations and medical facilities reduce costs, operate more efficiently and go green. Organizations rely on Digiscribe to automate paper-intensive processes including accounts payable, human resources and customer service. Areas of expertise include document scanning, online document management services, PO Box scanning services, workflow automation software, full-text OCR, e-Forms, e-mail management, business process outsourcing, DIY document imaging software, and box & media storage. Services can be outsourced to Digiscribe New England's Kodak-Certified processing facility, located just outside of Boston or implemented on-site. Digiscribe New England is a sister company of New York-based Digiscribe International.
