Integrate Oracle Fusion CRM and Accounting

## Improve Workflow between CRM and Accounting

While Sales team likes to work in CRM, Accountants prefer their accounting software to manage A/R, A/P and others. With the prebuilt integration between Oracle CRM Fusion and Accounting packages like QuickBooks, Microsoft Dynamics GP and likes, you now have the capability to streamline process between Sales and Accounting.

Reduce Double Data Entry and Reconciliation

One of the reasons of any integration project is to reduce double data entry of information. Having a well integrated system, not only speeds order processing, but also reduces a lot of manual entries and reconciliations. The default integration helps in managing reduced manual efforts in three primary areas –

1. Customer management
2. Product management
3. A/R Management through tracking Invoices across the process.

Further, a well integrated Opportunity to Invoice process, will also provide your sales team on visibility across payments and so you can better manage expectation, commissions and more.

Access to Critical Information in Oracle CRM Fusion

Our integration also provides an easy to use mapping to push accounting information into Oracle CRM Fusion. Now you can track balances, Product inventory availability and more all within your Oracle CRM Fusion.

Completely Customizable

DBSync provides an integration workbench with pre-configured templates. All you have to do is to setup your connecting end points and get started. You can take our existing templates and change to adapt it to your needs – add new integration processes, map new fields and more.

Bottom Line

DBSync provides an easy to use, pre-configured Cloud platform to connect your Oracle CRM Fusion with popular Accounting packages like QuickBooks, Microsoft Dynamics GP, Intacct and more to reduce double data entry, increase visibility and streamline business processes.
