Call 1-800-300-5512 or Go online to: www.healthclick.com/courses/nas05.cfm for hotel and course location information.

Certificates of attendance for CEU verification are provided after successful completion of the course.

This course is 15 contact hours/1.5 ceu's

This course is 18 contact hours/1.8 ceu's for therapists licensed in Florida, Illinois, New York, North Carolina or the District of Columbia

BOC Provider #P2047 IIL PT Provider #216000074 FL OT provider #50-1442 | AOTA Provider #4487 NCBTMB Approved Provider #280670-00

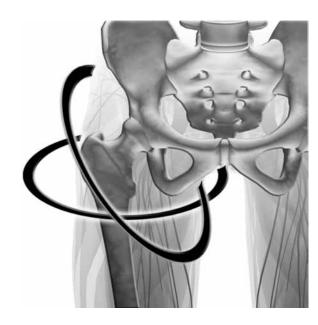

The California Physical Therapy Board has approved North American Seminars, Inc. as an approval agency to approve providers offering continuing competency courses. This course meets the standards set forth in section 1399.96 of the California Code of Regulation and is approved for 15.0 hrs, 1.50 CEU's for physical therapy continuing competency license renewal requirements in the State of California, approval # PTNAS-201489. This course meets the ceu requirements for occupational therapists licensed in California. This course has been approved by the Nevada State Board of Physical Therapy Examiners for 1.5 Units of Continuing education. NAS is approved by the IDPR to provide ceu's for physical therapists and assistants licensed in Illinois. IL PT Provider #216000074. This course meets the continuing education requirements for physical therapists in the States of Alaska, Colorado, Connecticut, Idaho, İndiana, Massachusetts, Missouri, Montana, New Hampshire, New Jersey, North Carolina, Oregon, Rhode Island, Utah, Vermont, Virginia, Washington and Wisconsin. FL OT provider # 50-1442. North American Seminars, Inc. is an AOTA provider for continuing education, provider #4487. The AOTA does not endorse specific course content, products or clinical procedures. The Alaska, Arkansas, Delaware, District of Columbia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Minnesota, Mississippi, Missouri, Montana, Nevada, New Hampshire, North Carolina, Ohio, Oregon, Oklahoma, Rhode Island, South Carolina, Tennessee, Texas, Vermont and Virginia occupational therapy regulatory boards accept courses presented by AOTA providers to meet the needs of OT continuing educational requirements. BOC Provider #P2047. The New York State Education Department, Office of the Professions has approved NAS as a continuing education sponsor for physical therapists and assistants licensed in New York.

Advanced Evaluation and Treatment of **Hip Pathologies**

An Evidence Based Course focusing on Differential Diagnosis and Treatment Solutions

Presented by Erik P. Meira, PT, SCS, CSCS

North American Seminars, Inc. 1-800-300-5512 Fax 1-800-310-5920 www.healthclick.com

Day Ono

Day One						
7:30 8:00	8:00 9:00	Registration Introduction and Course Overview • Understanding evidence based practice • The need for scientific scrutiny in rehab • Functional outcomes regarding the hip • Using a systematic approach to diagnosis and treatment to maximize efficiency and outcomes				
9:00	9:45	Anatomy/Physiology (Lecture) Clinically relevant anatomy of the hip Physiology of intra-articular structures Biomechanics of the hip				
9:45 10:00		Break Intra-Articular Pathology (Lecture) • Understanding femoroacetabular (FAI) impingement • Acetabular labral tears: prevalence and mechanisms of injury				
11:00	12:00	 The difficulties with diagnostics Examination of the Hip-Intra-Articular Pathology (Lecture) Overview of special tests Application of sensitivity and specificity information Incorporating patient history into the evaluation Understanding limitations in differentiation of FAI, labral tears, instability and chondral damage 				
12:00 1:00	1:00 3:00	Lunch (on your own) Examination of the Hip-Intra-Articular Pathology (Lab) • Special tests • Emphasis on efficiency and accuracy of the tests				
3:00	3:30	Mastering diagnostic skills Surgical Management of Intra-Articular Pathology (Lecture) Overview of current surgical techniques focusing on hip arthroscopy Expected outcomes from surgery Video demonstrations of common procedures such as femoroplasty, rim trimming, labral repair, microfracture and debridement				
3:30 3:45	3:45 4:45	Break Postoperative Management Hip Arthroscopy (Lecture) Goal setting Common postsurgical concerns specific to different procedures Understanding relevant benchmarks specific to postoperative hip				
4:45	5:45	Postoperative Management of Hip Arthroscopy (Lab) Initial hands on techniques Basic safe movements initiation Activating the hip abductors Progressing to general lower quarter program				
5:45	6:00	Review/Questions				

			Day Two
	8:00	9:00	Extra-Aricular Pathology (Lecture) Internal and external coxa saltans Hip flexor pathology Bursitis Piriformis syndrome: fact or fiction? Hip mimickers such as athletic pubalgia and sports hernia
	9:00	9:45	Examination of the Hip-Extra-Articular Pathology (Lecture) • Differentiating between the joint and the surrounding tissues • Validity and relevance of certain tests • Understanding uncertainty • Knowing what you don't know
	9:45	10:00	Break
			Examination of the Hip – Extra-Articular Pathology (Lab) • Emphasis on efficiency and accuracy • Streamlining the clinical assessment • Combining a full intra-and extra-articular examination
	11:30	12:30	Lunch (On your own)
ıl		1:30	
ie			disorders such as iliotibial band syndrome and patellofemoral pain syndrome: fact or fiction?
	1:30	3:00	 Developing a general lower quarter protocol General Lower Quarter Program (Lab) Applying science to treatment Understanding requirements for full
res			functional return to baseline • Developing a program that considers ultimate goals during early phases • Returning higher level patients to sports/ recreational activities
	3:00	3:45	Case Presentations (Lecture/Lab)
)			Skills that can be used tomorrow morning

About the Educator

Erik P. Meira, PT. SCS, CSCS is currently the lead physical therapist and clinic director of Black Diamond Physical Therapy in Portland, OR, a clinic that specializes in sports rehabilitation. He is a Board Certified Sports Clinical Specialist and an NSCA Certified Strength and Conditioning Specialist with extensive experience in the management of sports injuries at many different levels. Erik is a regular peer reviewer for several medical journals and is currently involved in research trying to establish best practices in postoperative rehabilitation of the hip joint.

Educated at the University of Florida he began his career at The George Washington University Hospital in Washington, DC before relocating to Portland, Oregon. Erik has lectured at many conferences including several sponsored through the National Strength and Conditioning Association (NSCA), the American Physical Therapy Association (APTA), and the National Athletic Trainers' Association (NATA) covering many topics such as the hip, knee, shoulder, exercise prescription, returning athletes to sport, science application, and PT practice business models. He is most often sought out for his extensive expertise regarding diagnosis, treatment, and surgical management of the hip joint. He has authored several articles and textbook chapters on many subjects including extra-articular hip pathology, non-surgical management of femoroacetabular impingement (FAI), and the role of the hip in lower extremity injuries. He is the founder and the original chair of the Hip Special Interest Group of the Sports Physical Therapy Section. Erik is a nationally recognized leader in the management of hip pathology, often consulting for professional and intercollegiate athletic programs. Starting in 2013 he will be the APTA Combined Sections Meeting Program Chair for the Sports Physical Therapy Section.

Online Continuing Education Courses

Pre-approved for Continuing Education www.healthclick.com/physical-therapy-online.cfm

Why You Should Attend This Course

This is a two-day advanced course that will involve lecture and extensive hands-on laboratory components to explore the current best practices for evaluation and treatment of hip disorders based on the latest evidence. Heavy emphasis will be placed on clinical application through extended lab sessions and multiple case examples utilizing information learned in the course. Focus will be placed on the advanced skills necessary to achieve an expert understanding of hip pathologies.

Physical therapists and trainers are often the first to see some of these difficult hip patients. It is important to be able to differentiate between intra-articular (pathologies such as femoroacetabular impingement (FAI), acetabular labral tears, and chondral damage) and extra-articular pathologies (such as: snapping hip, greater trochanteric bursitis and hip flexor pathologies). Through lecture and laboratory sessions, participants will learn how to perform a comprehensive clinical evaluation (including hands-on special testing), develop systematic treatment plans including the latest evidence-based interventions, and make appropriate referrals when necessary. Current concepts of how the hip region may also play a role in other lower extremity injuries, such as patellofemoral pain syndrome and iliotibial band syndrome, will also be discussed. Participants will leave the course with tools that can be used immediately which will make their practice more precise, efficient, and effective resulting in improved overall outcomes.

Course Objectives

Upon completion of this course, participants will be able to:

- Apply scientific scrutiny and evidence-based practice to their practice and professional development.
- Understand the benefits of a systematic approach to evaluation and treatment.
- Determine the best functional outcome indicator for their patient population.
- Identify clinically relevant anatomy and physiology of the hip joint.
- Describe femoroacetabular impingement and its role in intra-articular hip pathology.
- Understand acetabular labral tears, their prevalence, their mechanisms of injury, and their clinical relevance.
- Expertly demonstrate and perform proper hands-on special tests for the hip joint and understand their sensitivity and specificity.
- Execute an efficient, confident, and accurate examination of the hip joint based on the current evidence.
- Interpret the examination findings in order to develop the most effective and efficient plan of care.
- Demonstrate an expert and comprehensive understanding of hip related disorders as described in the current literature.
- Make an appropriate referral for surgical consultation regarding intra-articular pathology.
- Describe current surgical techniques including hip arthroscopy and expected outcomes.
- Understand postoperative concerns pertaining to the hip.
- Confidently develop an effective and efficient postoperative management strategy for each patient.
- Classify extra-articular hip pathology for conditions described in this course.
- Differentiate between intra- and extra-articular hip pathology.
- Understand and apply current research regarding possible hip generated mechanisms around patellofemoral pain syndrome and ilitiotibial syndrome.
- Develop a comprehensive lower quarter program to achieve maximal functional return for a spectrum of patients from those who are sedentary to professional athletes.
- Demonstrate real world clinical application of concepts discussed in this course.
