

# Celebrate Family History Month

## DNA: THE SECRET TO FAMILY HISTORY

## genealogy workshop

**Thursday, Oct. 11, 2012 | 1-5 p.m.**

**George Bush Presidential Library and Museum**

Whether you're just getting started or already an experienced researcher, join us as we present a FREE half-day workshop designed for all levels of genealogical interest.

The keynote speaker is Bennett Greenspan, the founder, president and CEO of Family Tree DNA, the largest DNA database in the world and a former official sponsor of NBC's "Who Do You Think You Are?" program.

The workshop lectures will show how to use DNA information to connect with

your ancestors, as well as living relatives, and how new advances can allow you to leave your own imprint for future generations.

Have you heard about DNA and the advances being made with genealogy, but been afraid to tackle this type of skilled research? Now is the time to enter the world of science and learn what secrets it may reveal for you and your family! Find out about this and more at our new exhibit "Genome: The Secret of How Life Works" on display now at the Bush Library and Museum.
