FOR INTEGRATION

Brilliant! Performance Pro and BambooHR are now integrated.

Performance Pro and BambooHR have teamed up to make HRIS and employee performance management data integration painless. You'll be all smiles!

The image shows a split-screen view of two HR software dashboards. On the left is the Performance Pro dashboard, featuring a sidebar with 'Employee Documents', 'Appraisals', 'Reports', 'Manage Employees', 'System Setup', and 'Administration'. It includes a calendar for October 2012 and a pie chart. On the right is the BambooHR dashboard, which has a blue header with 'bambooHR' and a search bar. The main area is titled 'Dashboard' and contains sections for 'Employee Stats' (a pie chart showing employment status: Full-time 70%, Part-time 18%, Contractor 12%, Officer 3%, Staff 1%), 'Company Announcements' (a list of posts like 'Halloween Party' and 'Welcome new employees!'), and 'Recent Activity' (a list of reports created by David Neuman). Both dashboards are set against a white background.

Step 1: Sign Up For Performance Pro if You Haven't Already!

Signing up for Performance Pro as your centralized employee performance management system is simple and easy. When you sign up we'll customize your account to fit your needs.

Step 2: Enable Your BambooHR Integration

Performance Pro and BambooHR have integrated to make your life easier. The integration is seamless and completely free...that means no additional processes or hidden costs.

Step 3: Update Your Employee Data

BambooHR's simple and easy-to-use interface allows you to update your employee data whenever and from wherever you want.

Step 4: Sit Back & Relax

Almost immediately after you make changes to your employee data in BambooHR, any relevant changes will automatically be updated in Performance Pro.

Step 5: Review Recent Changes

After changes have been made, simply log into Performance Pro to review and verify.

Step 6: Save Time & Money

Since everything is automated, you'll be saving time and money with the BambooHR and Performance Pro integration. Now you'll finally have time to take a full lunch break!

Performance Pro is a user-friendly, online employee performance management system developed by HRN Performance Solutions for small to medium sized companies. Today, Performance Pro is in use by nearly 900 clients representing a wide variety of industries.

Performance Pro works the way you work and includes all the bells and whistles plus everything you need to simplify, automate and improve your employee performance management program—secure data hosting, online storage, implementation, customer support, upgrades, manager tools and loads of top notch position, goal and job description content.

BambooHR delivers easy-to-use human resources software that drastically reduces the time, cost, and complexity of managing employee data for small to medium-sized companies.

Too many human resource professionals are buried under mountains of spreadsheets and forms. Employee data needs to be centralized with options to automate tracking, share information with managers, and give appropriate access to employees. BambooHR's refreshingly simple software can be accessed from anywhere and anytime, and makes life easier all the time.
