NEW! Advanced Face Wrap

Radiant results. Balanced support. Fast healing.

The advanced face wrap merges exceptional support with unsurpassed comfort. Features include a soft durable band supporting the jaw/chin region and extending to the top of the head with conveniently positioned Velcro closures. This Unisex design is available in beige.

Ideal following a variety of procedures

Achieve gorgeous healing results following ear surgery (otoplasty), facelift (rhytidectomy), chinlift, neck lift, and submental liposuction.

Medical-grade healing

When applied correctly, compression wear can increase blood circulation around surgical areas to accelerate healing, diminish swelling, and flush out harmful fluids. In the event of sudden movements such as sneezing or coughing, the garments help protect and stabilize the surgical site, resulting in a cleaner surgical area with minimal scarring.

Nouvelle facial support garments offer a harmonious blend of exquisitely-soft fabric and advanced compression technology for exceptional healing results.

Flawlessly fashioned

Nouvelle's exclusive medical-grade designs cannot be found in retail stores. We proudly offer only latex-free products MADE IN THE USA. Our garments use a 55% Lycra®/45% nylon content for a smooth, comfortable feeling next to healing skin. This fabric combination ensures garments never lose compression integrity with continual use and appropriate laundering.
