

LMS Redefined: Taking your LMS from hum-drum to...WHOA.

Some LMS solutions fit like a square peg in a round hole.

Not this one.

Say good-bye to separate learning solution portals.

inteVISTA LMS eliminates the need for complex integration by leveraging an organization's existing website. This approach delivers content that takes on the look and feel of the organization's own web portal. The best part? It provides a seamless end-user experience and dramatically reduces implementation time.

Whether providing content to employees at a Fortune 500 company, students at a higher learning establishment, or selling online training courses, users get a seamless experience of logging into your existing web portal once and accessing inteVISTA directly. No need to sign in twice!

The LMS for Adobe Connect.

inteVISTA LMS is designed to work in conjunction with industry leading online collaboration solution, Adobe Connect, by utilizing its content management feature to store and deliver all of your rich media eLearning content and virtual classrooms. Plus, with the new version of Adobe Connect, you now have the ability to author new learning content once and publish it across virtually any device, cutting creation time from weeks to a matter of days.

The New Green.

We know that green technology is smart business. It saves the environment while reducing costs associated with facilities and travel. On the subject of money, it's no secret that in today's economy, every penny counts. That's why inteVISTA LMS has been built to include the most sought-after features at an affordable price with built-in eCommerce functionality that helps you drive new revenue streams for your organization. inteVISTA expands the definition of green!

And just like how all organizations are not created equal, neither should your LMS. InteSolv's award winning software development team has developed inteVISTA LMS with the ability to be customized to fit your unique needs. Contact InteSolv for more information.

In a nutshell, inteVISTA LMS is sleek, simple, sophisticated and, one could even say, stupendous.

It's what an LMS should be. This is LMS redefined.

[inteVISTA LMS]

- Inserts right into your existing website
