

About Intrepid Learning

At Intrepid, we believe learning has the power to inspire individuals and transform organizational performance. An award winning learning services and technology company, Intrepid is dedicated to helping organizations apply learning and technology to accelerate workforce productivity and drive business growth. Founded in 1999, Intrepid is headquartered in Seattle, Washington.

LEARNING SERVICES

Our consultants, instructional designers, technologists and trainers can help you design, build, optimize, and measure the effectiveness of your learning programs.

LEARNING OUTSOURCING

Intrepid is one of only seven companies to have been named a top training outsourcing provider every single year since 2004 by Training Industry, Inc.

Our clients find outsourcing services help them easily and efficiently manage resources up or down as needed, reduce costs, achieve greater geographic reach, obtain expertise lacking in their organization, and improve the quality of training delivery.

- Program Management
- Training Delivery
- Learning Administration

LEARNING TECHNOLOGY

Intrepid offers a web-based informal learning portal and mobile extension designed to make learning engaging, easy, intuitive and fast.

Built in response to the poor usability, lackluster reporting and inflexibility of many learning management systems Intrepid Agile™ frees people to learn and work more naturally, quickly and collaboratively. Learners guide their own learning experience, accessing micro-learning content on-demand — content such as short video, podcasts, quizzes, polls, courselets, blogs, brief articles, wikis, etc. By emphasizing speed and relevancy, Intrepid Agile enables the kind of “finger-tip” learning and rapid decision-making support people crave today.

- Intrepid Agile™
- Intrepid Mobile™

THE BUSINESS IMPERATIVE FOR LEARNING

The winning organizations of tomorrow will be those that can:

- Adapt quickly to dynamic market conditions.
- Rapidly seize new opportunities.
- Exceed the expectations of skeptical and savvy customers.

WHAT WILL THIS REQUIRE? A workforce primed to continuously learn, adapt, innovate, share and apply its knowledge. But old learning models can't keep pace with the speed of change today.

A new model is emerging – one that enables people to learn more naturally, quickly, collaboratively and in context with their work and the goals they want to achieve.

How Intrepid Learning Drives Business Agility

Informal learning technology – such as self-service learning portals, collaborative tools, social networks and mobile devices – is helping organizations destroy silos and cultivate among employees the agility, adaptability and innovation needed to compete in today's unpredictable world.

Intrepid harnesses its learning services together with its Software-as-a-Service agile learning portal, Intrepid Agile, to help organizations enhance performance across the extended enterprise.
