OnRamp Announces Promotions as the Company Aligns for Continued Growth

AUSTIN, TX – OnRamp Access is proud to announce the promotion of Marketing Director, Debra Danziger and NOC Operations Manager, Shana Ravnsborg to Vice President of Marketing and Vice President of Operations respectively.

Since starting at OnRamp over 6 years ago, Debra has stepped up to take ownership of a number of key functions to support both Marketing and Sales efforts within the company. She is responsible for the development and management of OnRamp's brand image, the creation and implementation of all marketing/advertising materials, the marketing/advertising strategy and budget, and the execution of all networking events and trade shows, amongst a host of other important duties.

Shana's focus has been centered on building systems and processes to improve how OnRamp delivers its services, since joining the company in August of 2011. She has been instrumental in building out an entirely new software interface for OnRamp's ongoing technical interactions with customers. In addition to these functions, Shana has been instrumental in dramatically improving the overall level of talent from which OnRamp now benefits within its Network Operations Center.

"OnRamp has been growing rapidly over the last 12 months," stated the company's CEO Lucas Braun. "Such growth creates the opportunity for all of us to take on additional responsibility in order to help the company handle the new challenges of reaching and working with a broader set of customers." In their roles as Vice President of Marketing and Vice President of Operations, Debra and Shana will take on expanding roles in contributing to the success of the company as it enters new stages of growth and prosperity.

About OnRamp
OnRamp was founded in 1994 in Austin, Texas. As one of Texas' first Internet operations companies, OnRamp's history is rooted in providing reliable and secure connectivity that enables distributed computing. Today, OnRamp is a data center operations company that delivers the highest levels of security, redundancy, reliability and technical expertise for colocation, managed hosting, cloud and disaster recovery backed by Full7Layer Support. www.onr.com
