OrangeLT™ | Legal Hold and Remote Collection

Legal Hold and Remote Collection Service

Orange Legal Technologies' Legal Hold and Remote Collection Service helps law firms and corporations conduct the critical eDiscovery tasks of legal hold and data collection for multiple sources from multiple locations without incurring the burdensome time, cost and equipment expenses associated with traditional onsite data collection and legal hold automation approaches.

Integrated. Defensible. Efficient.

Delivered from the industry's only integrated legal hold and document collection system, the service is web accessible and delivered via a Software-as-a-Service (SaaS) model. This approach allows users to defensibly and efficiently execute legal holds and remote collections without any incremental infrastructure or application investment. Additionally, collected ESI can also be processed, filtered, analyzed (early data assessment) and reviewed with the OneO® Discovery Platform from OrangeLT[™].

Service Task	Task Description
FREE Legal Hold	Manage Legal Hold Notifications and Acknowledgements.
Remote Collection	Remotely Identify and Collect Electronically Stored Information (ESI).

Centralized. Flexible. Automated.

Legal Hold provides users with a simple-to-use solution that eases the burdens of legal hold management and can be implemented without any software to install or hardware to purchase. Within minutes, a new Legal Hold can be created and distributed, complete with acknowledgement tracking, automated reminders and detailed audit reporting. All of these tasks are completed from a secure user interface, and once completed, users are guided through the process of remote collection.

Legal Hold features include:

- Centralized Control
- Web-Based Management
- Flexible Legal Hold Notices
- Acknowledgement Tracking
- Auto Acknowledgement Reminders
- Easily Updated Recipient Lists
- Centralized Control Panel
- Detailed Audit Reports
- Quick Hold Releases

The FREE Legal Hold feature from Orange Legal Technologies is provided at no cost to clients and can be leveraged as a standalone tool or as part of the complete Legal Hold and Remote Collection Service.

Nominal fees do apply for Remote Collection features.

OrangeLT[™] | Legal Hold with Remote Collection

Multiple Custodians. Multiple Locations. One Remote Collection Tool.

Remote Collection provides users with the ability to collect remotely from multiple custodians simultaneously and receive live updates on the status and amount of ESI collected. With no software to install and with minimal business disruption, collections are initiated via email notification, followed by wizard driven instructions for using the remote collection application. Once complete, the collected ESI can then be further processed and filtered.

Efficiency. Expertise. Infrastructure.

In addition to the Legal Hold and Remote Collection Service, OrangeLT offers a complete suite of electronic discovery technologies and professional services for the collection, analysis, processing, review and production of digital and paper-based information. While providing expert staff to support knowledge intensive services ranging from forensic data collection to managed attorney review, OrangeLT supports core services with its proprietary OneO® Discovery Platform. The **OneO Discovery Platform** is an advanced technology platform that provides clients integrated, web-accessible online analytics (early case/ data assessment), and processing and review of electronically stored information (ESI) from the security of a hosted centralized repository. By leveraging both the Legal Hold and Remote Collection Service and the OneO Discovery Platform, users can manage ESI across the entire spectrum of the litigation lifecycle from legal hold to ESI production.
