competition**

HiTEC® 8703 THF Tractor Fluid

Field-proven performance protects equipment

Superior Wear Performance

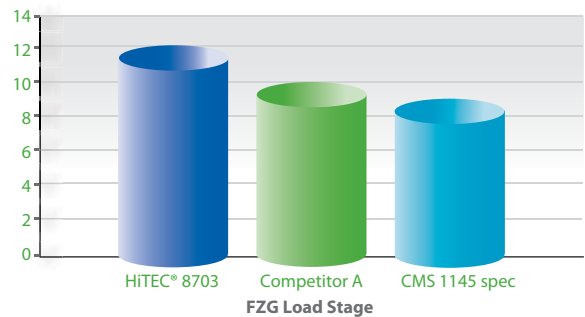

Industry tests subject the oil to increasingly high loads which eventually wear gears. Our fluids withstand these higher loads and protect metal surfaces better to extend the life of equipment.

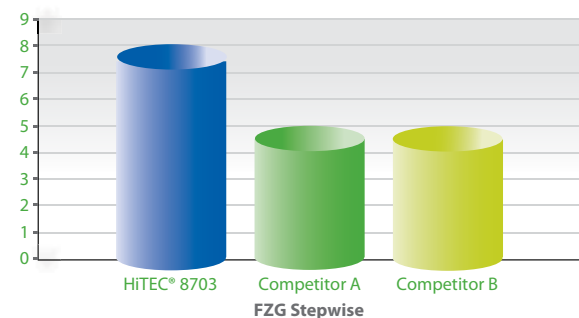

We outperform the competition to give you consistent performance, reduced downtime and more reliable operation for generations to come

Hydraulic Fluid Additive Package: Protection against wear, water and corrosion

Outstanding Water Tolerance

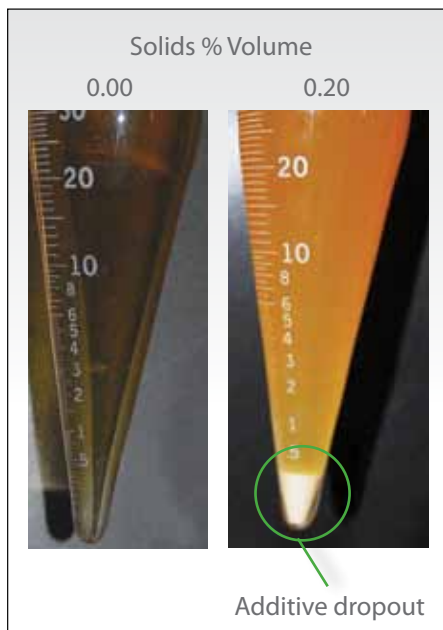

Since water contamination can't be avoided, our fluids are designed to emulsify water and protect equipment from rust during idle periods. HiTEC® 8703 does this without stripping out the critical additives that protect equipment.

Exceptional Corrosion Protection

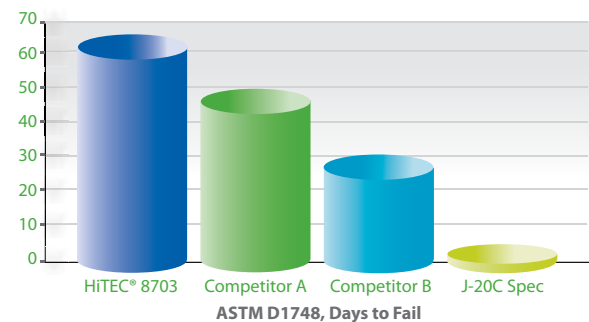

HiTEC® 8703 offers extended corrosion protection in transmissions, hydraulics and axles, and prevents rust from developing in these critical components. Tests show it not only outperforms the competition—it also far exceeds OEM specifications.

HiTEC® 8703 THF meets John Deere and many other major OEM specifications and is designed especially for agricultural equipment

- Superior friction durability
- Advanced final drive performance
- Superior pump wear protection
- Excellent cleanliness
- Proven field performance
