

Integrated services to help your Marina provide cutting edge service

StackTrack is a revolutionary software application that automates and simplifies your drystack launch reservations while being integrated with your DockMaster system. Making it possible for the marina to manage and fulfill these requests efficiently.

- Configurable launch slot control
- Real-time Marina Dashboard View
- Detailed reporting and Daily Pull List
- Tablet interface for Forklift Operator
- Notifies customer of status changes like Launched & Ready and Stowed & Secure
- Reminders sent to customer to reduce “no-shows”
- Give 24 hour convenience to your customers while being fully integrated with your DockMaster system for peak internal efficiency.
- Text, Email and DockMaster notifications alert you when a customer has made a launch request
- Web application allows customers to schedule launches conveniently from their mobile device or computer.
