# Automate HIPAA Compliance

Cost-Effective Solutions for Complex Requirements

for

Healthcare & Business

Remediates ● Customizable

HIPAA ComplyPAK™ Features & Functions

- The HIPAA ComplyPAK™ software system automates the compliance process for both Covered Entities (CEs) and Business Associates (BAs).

- Employee activity involved in reading procedures or using controls is monitored and timed so reports can be created for management of compliance activity.

- HIPAA forms and sample legal documents are provided online for signature and storage including BA Agreements, Authorization, and Consent forms.

- Online tools give organizations the ability to audit and **remediate** networks and security.

- HIPAA ComplyPAK™ can produce hundreds of compliance and analytical reports based on use of the software to document proof of compliance in the event of an audit.

- **Automated "accounting of disclosures"** provides organizations with the ability to create accurate and timely reports for patients.

- Automated tools enable compliance with the **"Minimum Necessary" rule** that relates to access, use and disclosures.

- Online training is available on demand and is updated as required for easy use.

- Certifications of online training can be created and stored in HIPAA ComplyPAK™

- Optional testing and scoring of training can be implemented.

- Online auditing tools give both CEs and BAs the ability to conduct unlimited audits on other organizations to ensure compliance with rules.
