# Mobile Responder

**SQUIRE TECH** Solutions, LLC

## Mobile Satellite Communication Solutions

*User friendly satellite communications when deploying your mobile operations is critical for any operation. Mobile Response teams and business operations need to communicate without relying on phone lines, cellular, or other fixed geographic resources. Squire Tech Solutions' Mobile Response Communications integrates with your communication systems to ensure connectivity where and when you need it.*

***Squire Tech Solutions' Mobile Responder (MR) Equipment Packages and Service Plans*** offer low satellite latency, high quality audio and video for live mobile response applications. Our small antennas fit easily on pCom® Response Trailer, Command Center, SUV or can easily be added to an existing trailer or vehicle. Automated hardware operation and bandwidth access free up valuable time to focus on other vital response tasks.
