

Allsup Disability Study: Income at Risk

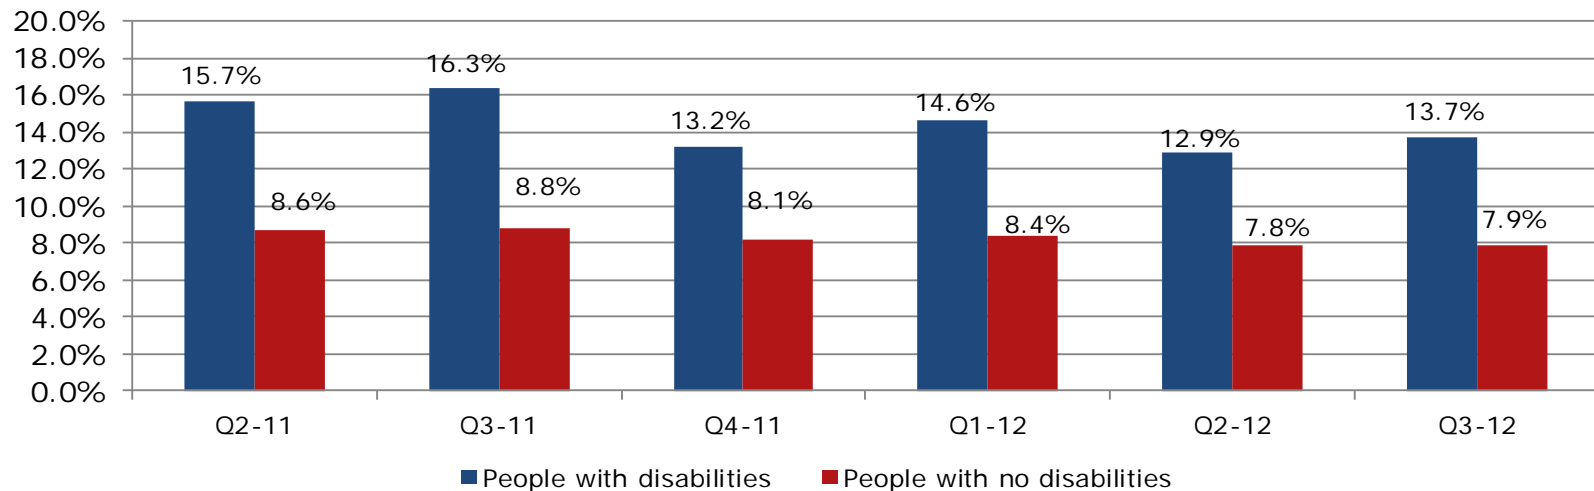

Examining income risk factors for people with disabilities

2012 Third Quarter Report
October 2012

Allsup Disability Study: Income at Risk

The quarterly unemployment rate for people with disabilities continues to be much higher than for those with no disabilities.

Quarterly unemployment rates

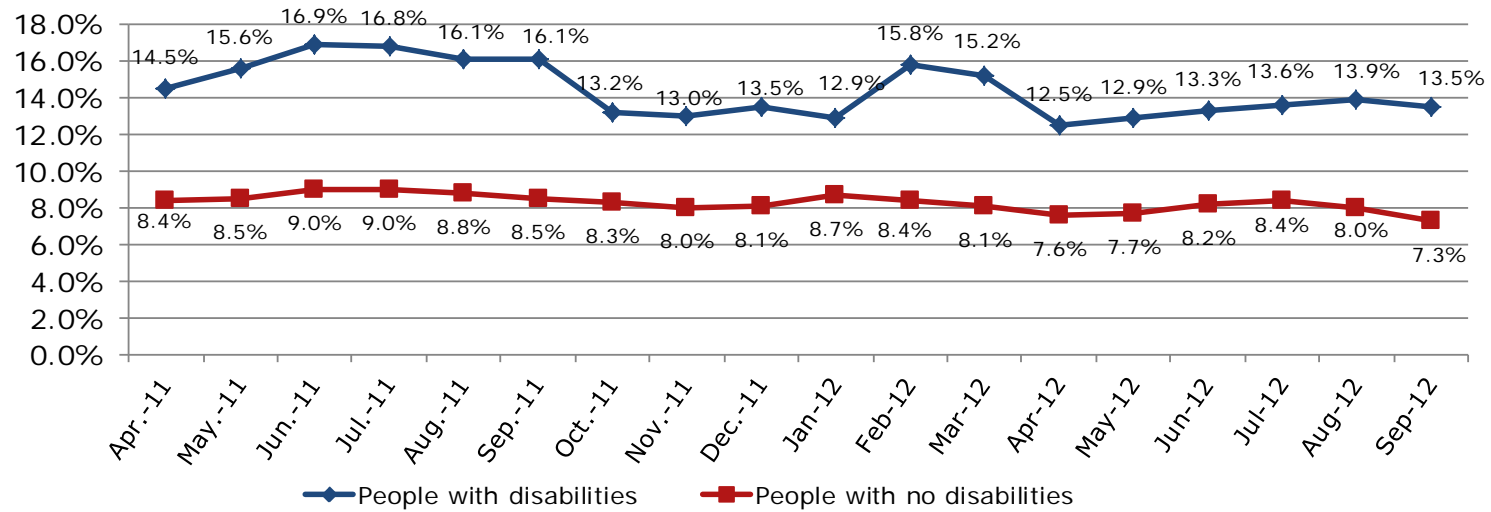

The third-quarter unemployment rate for people with disabilities showed a notable increase to 13.7 percent, from 12.9 percent in the previous quarter. However, the third-quarter 2012 rate declined compared with the same period in 2011. For third quarter 2012, people with disabilities experienced an unemployment rate nearly 73 percent higher than people with no disabilities.

Allsup Disability Study: Income at Risk

The monthly unemployment rate for people with disabilities rose slightly through the second quarter and the start of the third quarter before seeing a slight decline in September 2012.

18-month unemployment rates

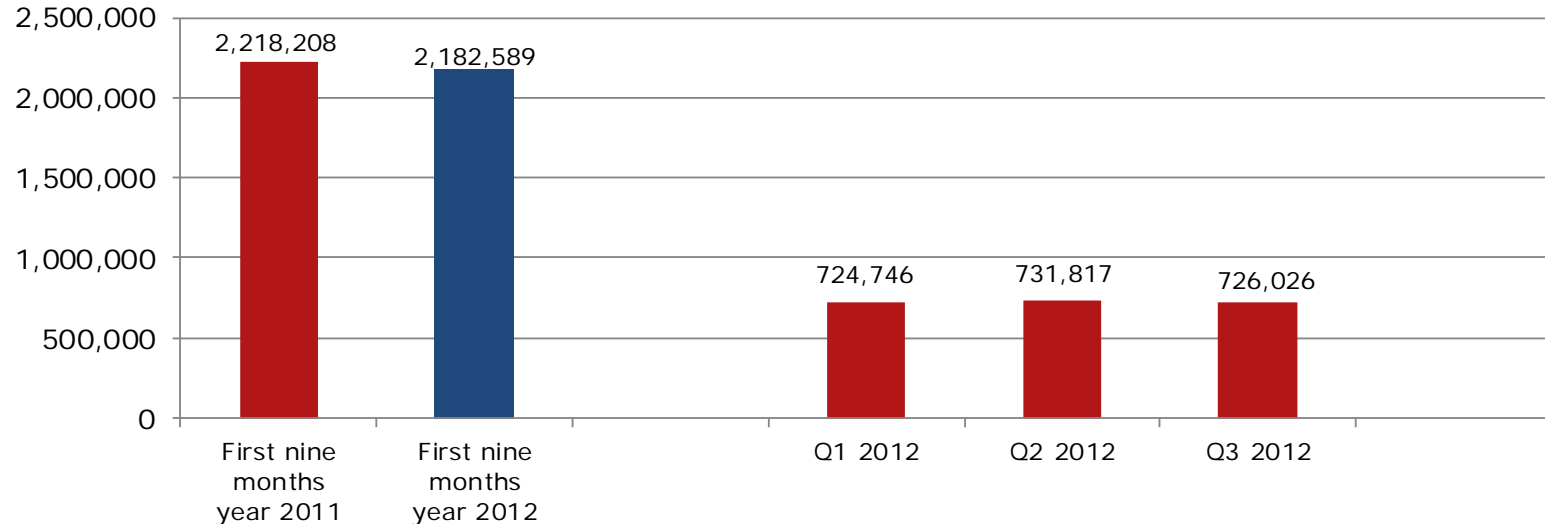

The unemployment rate for people with disabilities in July and August rose slightly before a modest dip in September. The unemployment gap between people without disabilities and those with disabilities remains significant.

Allsup Disability Study: Income at Risk

Social Security Disability Insurance applications for the first three quarters of 2012 decreased nearly 2 percent compared to the same period 2011.

SSDI applications

The number of people applying for Social Security Disability Insurance benefits decreased by less than 1 percent from the second quarter to the third quarter of 2012. Year-to-date, the number of people applying for SSDI benefits was down 1.6 percent for the first three quarters of 2012 compared to the same period in 2011.
