

Forex Striker: Review Reveals The World's First USA Patented Forex Robot

Summary: WealthSpringMarketing.com releases a review of Forex Striker, the first Forex Trading robot in history registered with the United States Patent and Trademark Office.

"The Forex Striker development team has just released Forex Striker to the public and everyone involved in Forex trading is talking about this monumental new technology," reports WealthSpringMarketing's Tiffany Hendricks. "Over 300 beta testers have already traded profitably using Forex Striker to quickly rack up over \$450,000 in net profits from small-scale accounts."

Forex Trading Robots are an easy-to-use, automated Forex trading solution poised to revolutionize the way money is made on the foreign exchange market. Forex Striker is the newest and most advanced Forex robot available making it the program of choice for Forex traders regardless of their level of investment experience.

Hendricks offers this explanation for the move towards automated Forex trading:

"Forex Striker's algorithm was designed to navigate changing market conditions and immediately respond, without requiring any action on the end users part," says Hendricks. "In layman's terms, this is a fully automatic artificial intelligence system that makes you money while you are off enjoying your life away from the computer." While profession Forex traders will undoubtedly see the benefit of using Forex Striker, Hendricks points out that Forex Striker will work for anyone interested in Forex, from housewives looking to create an automated income stream to college kids looking for an alternative to finding a day job.

"Forex Striker was designed to be a long-term investment tool, that anyone with any level of experience can set up and run with no real 'learning curve' to speak of," says Hendricks. "Even the most novice trader can trade successfully in the Forex arena using Forex trading tools like the Forex Striker."
