

# webmanager

WHAT SETS IT APART FROM OTHER WEBSITE SERVICES?

**It's easier to make changes yourself.** Plenty of our competitors design nice websites, but you're forced to call them for even the smallest tweaks. WebManager's simple interface lets you drag, drop and do it yourself — no experience necessary. Changes instantly sync to your mobile site, too.

**Complete integration with a dynamite DMS.** Once your dealer management system and website start sharing information, you'll wonder how you ever ran a dealership any other way. Our expandable and easy-to-use DeskManager DMS starts at just \$595, a one-time fee.

**The best tech support in the industry.** Our in-house staff is knowledgeable, patient and friendly. We also offer free weekly training webinars to help you maximize your investment in AutoManager products.

**The fastest way to get vehicles on Craigslist.** With automatic Captcha solving and timer-based posting, you can check a few boxes and go back to the floor as our Auto-Post Utility uploads vehicles by itself.

**Better tools for measuring success.** We use the stats-crunching power of Google Analytics to bring you clear, easy-to-read graphs of your website performance. See where your site appears in search engines, which vehicles are getting views and how your prices compare to local competitors.

**Knowledgeable, in-house SEO experts.** We don't outsource your SEO to other countries. Whatever results you need, you can talk to the person who's helping you achieve them.
