Foundation ArmorTM Professional Grade Concrete Sealer

CONCRETE SEALERS

ARMOR S1000™ (sodium silicate)

- Proprietary Blend
- Penetrates Up to 2"
- Two-Coat Application
- 24 Hour Dry Time
- Concentrated
- Permanent Solution
- Available in 1, 5 or 55 gallon drum

ARMOR S2000™ (sodium silicate plus)

- Proprietary Blend
- Penetrates Up to 4"
- Two-Coat Application
- 24 Hour Dry Time
- Concentrated
- Permanent Solution
- Available in 1, 5 or 55 gallon drum

ARMOR L3000™ (lithium silicate)

- Proprietary Blend
- Penetrates Up to 2"
- One-Coat Application
- 6 Hour Dry Time
- Concentrated
- Permanent Solution
- Available in 1, 5 or 55 gallon drum

BRICK • MASONRY SEALERS

ARMOR SB1000™ (sodium silicate)

- Proprietary Blend
- Penetrates Up to 2"
- Two-Coat Application
- 24 Hour Dry Time
- Concentrated
- Permanent Solution
- Available in 1, 5 or 55 gallon drum

ARMOR SB2000™ (sodium silicate plus)

- Proprietary Blend
- Penetrates Up to 4"
- Two-Coat Application
- 24 Hour Dry Time
- Concentrated
- Permanent Solution
- Available in 1, 5 or 55 gallon drum

ARMOR LB3000™ (lithium silicate)

- Proprietary Blend
- Penetrates Up to 2"
- One-Coat Application
- 6 Hour Dry Time
- Concentrated
- Permanent Solution
- Available in 1, 5 or 55 gallon drum

SEALER BENEFITS

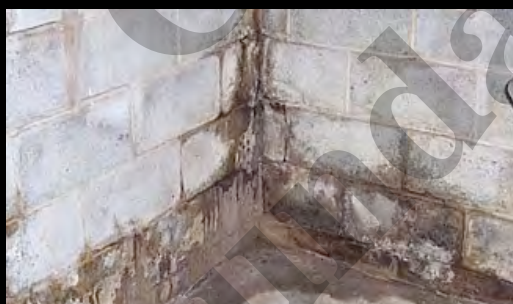

STOPS EFFLORESCENCE

STOPS MOLD & MILDEW

STOPS CRACKING & SPALLING

STOPS WATER, MOISTURE, RADON

Foundation Armor™ sealers are highly concentrated, non-toxic, penetrating, permanent sealers specifically formulated to seal, strengthen, and protect concrete, brick, cement, and other masonry surfaces. Foundation Armor sealers undergo a chemical reaction with the free calcium and lime naturally found in concrete, brick, and masonry – dramatically enhancing their natural characteristics and reducing the capillary voids to practically zero.

Foundation Armor™ sealers don't alter, stain, discolor or change the texture of the surface. They can be used on interior and exterior, above/below grade applications, and on vertical and horizontal surfaces.

FOUNDATION ARMOR™ SEALERS STOP:

- Water and vapor migration up to 100psi
- Moisture vapor transmission up to .015 WVT
- Alkali attack and efflorescence attack

FOUNDATION ARMOR™ SEALERS REDUCE:

- Transmission of hazardous gases, including Radon
- The absorption of chemicals, chlorides, solvents, fats and oils
- Internal chlorides by up to 50%-90%

FOUNDATION ARMOR™ SEALERS PREVENT:

- The growth of mold, mildew, bacteria, lichen, and moss
- Flaking, cracking, scaling and spalling caused during freeze-thaw cycles
- Surface deterioration and discoloration

FOUNDATION ARMOR™ SEALERS INCREASE:

- Overall strength, hardness, and density by up to 45%
- Bond strength of epoxies, paints, and stains by up to 20%

FOUNDATION ARMOR™ SEALERS:

- **NEVER** peel, flake, or fade
- **NEVER** stain from exposure to UV rays
- **NEVER** leave behind a slippery surface coating
- **NEVER** have to be re-applied or maintained

ABOUT US

ACCREDITED
BUSINESS

FOUNDATION ARMOR™

Foundation Armor™ products are the result of an unmatched dedication to developing the most effective, affordable, and improved methods for sealing and repairing concrete, brick, and masonry.

Unbiased Advice –As specialists at sealing and repairing cementitious substrates, we're driven to stay on-top of the most current products, resources, and research in the market place. We operate our business ethically and with integrity – it is our mission to help you make the most informed decisions about sealing and repairing concrete, brick, and masonry.

Customer Support - From cleaning and preparation, to product selection and application, we are here for you every step of the way. Our products have been tested on an array of applications, and are proven to waterproof, seal, strengthen and fortify cementitious substrates.

Convenience – Foundation Armor™ has manufacturing facilities in New York, California, Florida, and Nevada. Residential orders are shipped out of our distribution warehouse in New Hampshire. Large industrial and commercial orders are shipped directly from the closest manufacturing facility.
