

# Mobilize your workforce.

Fast. Simple. Secure.

Splashtop for Business is a secure, high-performance solution for organizations to provide and manage access for mobile users. Now employees on the go can enjoy all the benefits of remotely accessing applications and data from their mobile devices as if they were in front of their computers.

## More than 10 million users

Splashtop for Business is built on top of the popular Splashtop Remote Desktop app that has been enjoyed by more than 10 million users and is Apple App Store's top 25 best-selling iPad apps of all time.

## BYOD -- Make it secure

You can support a company-wide BYOD initiative with a single, universal solution and not have to deploy and support multiple ones. Mobile users can enjoy all the benefits of working with their existing applications as if they were in front of their computers.

## A high performance and intuitive, 3D/HD experience

User can enjoy a truly interactive and intuitive experience with Splashtop's legendary patent-pending streaming technology and ease of use. Use a familiar user interface with existing applications on a mobile device without retraining users or re-engineering applications. Splashtop for Business is capable of delivering 3D graphics and HD video - no compromise.

## Secure, on-premise solution hosted on your servers

Hosted on your existing servers behind the firewall, Splashtop for Business enables you to increase user productivity and security while keeping costs low. With Active Directory support, there is no need to manage a separate user database.

## Cost effective and simple to set up in 30 minutes

Splashtop for Business does not require major network/server infrastructure changes or SaaS/cloud services to operate. No additional network hardware or software components (gateways or accelerators) are necessary to speed up remote user sessions. Use existing applications that you have already paid for.

## Remove VPN and RDP headaches

Implementing mobile VPN clients and RDP apps creates support headaches, drives up costs and reduces overall performance. Using Splashtop for Business, those problems simply disappear!

## No VDI experience required

By leaving corporate applications where they are – on the employee's physical desktop – not only is there no data leakage-IT is freed from the task of building VDI server farms or implementing SANs.

## Who benefits?

- IT staff can now centrally manage and secure connections between mobile devices and desktops
- Field sales reps can access their company's internal CRM system or the latest sales presentation
- Telecommuters can work from home and access their desktop
- Healthcare professionals can easily access patient records and comply with HIPAA<sup>†</sup>
- Teachers can access their PC from all four corners of the classroom – bringing the lesson to the student

<sup>†</sup> Helps meet HIPAA compliance
