vPublish™
Video application for the next generation in education

SOLUTION DATASHEET

- Support key teaching use cases of all educators
- Connect, collaborate and reach new learners beyond the classroom
- Improve students' at-home studies with easily accessible, recorded classroom lectures
- Engage students with different styles of learning
- Scale deployments with an education specific solution
- Adopt easily across an entire organization

Vyopta vPublish for Education harnesses the power of video to connect students and educators anytime, anywhere and provide endless possibilities for collaboration and knowledge sharing.

SOLUTION OVERVIEW

There is a vast need in education for advanced technology that engages students with new learning styles and that can be easily adopted, integrated and scaled for effective use by all participants from students to teachers and IT professionals to administrators. Educators and administrators need technology that improves instructor efficiency, utilizes valuable resources and improves students performance and outcomes. Vyopta vPublish for Education integrates video across classrooms, school districts and university systems and allows teachers to connect, present, record and share virtually anything, anytime and anywhere. Vyopta vPublish is one way we are empowering educators and preparing students for life in a next generation society.

KEY FEATURES

- *Lecture capture*—live classroom recording for later review of lectures for improved understanding and outcomes, with support for distance education.
- *Simple teaching technology*—user friendly presentation and video call controls makes it easy for educators to focus on teaching, not relying on IT and audio-visual teams.
- *Video source switching*—switch among video sources such as a document camera, interactive whiteboard, classroom camera and PC presentation.
- *Video compositing*—view simultaneous video feeds from multiple sources, such as room view, lecture materials and PowerPoint presentation.
- *Secure access to recorded lectures*—publish class lectures into access protected groups for review by only those students currently enrolled in the class.
- *Scalable infrastructure*—Vyopta's cloud based solutions are scalable, enabling quicker large scale deployments with less IT staffing requirements to maintain.

KEY BENEFITS

- Consult with other instructors, professors or guest lecturers across facilities, across states, or across the country in a live classroom environment.
- Foster greater understanding of lectures and training using video sources from your document camera, PC presentations and interactive white board.
- Empowers the educator to discover new teaching techniques such as the flipped classroom approach.
- Connect geographically disparate people into a virtual classroom for training, consultation and specialized collaboration.
- Enhance knowledge sharing with recorded class lectures, allowing students to listen and view lectures when and where they desire and helping people fill the demand for increased access to educational content and curricula.

APPLICATIONS

Flipped Classroom

Vyopta vPublish for Education allows educators to record and share their lectures online for their students to watch before they come to class. Educators are then able to spend more time engaging and collaborating with students as they complete homework or other hands-on learning activities during the normal school day.

Distance Education

Vyopta vPublish for Education imparts distance learning to support students educational needs. Students can view the same lecture that was presented in the live classroom along with all of the educators materials, including content from PowerPoint presentations, document cameras and interactive whiteboards. Vyopta's solution can be integrated into the institutions Learning Management System allowing students to securely and easily access recorded lecture content.

Continuing Professional Education

Vyopta vPublish for Education can be used for administrators or managers to provide educators a way to attend annual training events without missing valuable classroom time with students. Additionally, morning announcements or other messages can be pre-recorded for future distribution or viewing.
