

# What is CMS Commander?

- An online service that allows you to manage any number of websites at the same time from one single account.
- Support for Wordpress, Drupal, Joomla and phpBB websites – all can be remotely controlled from a single platform.

# What can CMS Commander do for You?

- **Remote Management** – manage all your websites from one central account.
  - Save lots of time
  - Work more efficiently by simplifying tedious tasks
- **Automatic Content** – enhance the content you write with related images, videos, affiliate products, ...
  - Improve your SEO and engage your visitors
  - Earn more money from targeted affiliate content

# Remote Management Features

- **Update** plugins, themes and Wordpress on all your websites
- **Install** a new plugin or theme on any number of websites
- **Backup** your whole network automatically and regularly
- **Manage** users, categories, articles and more
- **Write** and **publish** new articles on many websites at the same time

# Automatic Content Features

- Insert related images, videos and more into the article you are working on.
- Bulk edit your old articles and add targeted product ads, images or other content automatically.
- Import PLR articles (or other content!), have them rewritten and then post and schedule them on your websites
- Many different useful applications for automatic content to benefit your websites (SEO, monetization and visitors)

# Automatic Content Sources

- Over 20 different content sources inc. many popular websites, PLR articles, RSS feeds and more
- All sources are entirely legal to be used on your own sites
- Currently 9 of the sources earn you additional income as an affiliate!

  
a Rakuten company
