

## **Replacement Trash Chute Parts Now Available Online from American Chute Systems**

*American Chute Systems is proud to announce their latest online product offering: replacement trash chute parts and doors. Visit the new store at <http://americanchutesystems.com/store>*

([PRWEB](#)) October 24, 2012 -- Replacing [trash chute parts](#) (and laundry/linen chute parts) can help keep your property safe and up to standard building codes. If trash chutes are not well taken care of, then they have the potential to become a hazard for anyone in the building. For example, a fire can spread rapidly if trash chute doors are not able to properly close. This can happen even if a fire started outside of the trash chute door's area.

American Chute Systems offers many different chute parts that will help keep trash chutes maintained and up to code. This includes items such as [t-handles](#), door hinges, closers and more.

American Chutes also offers high-quality [stainless steel trash chute doors](#) at very competitive prices. The doors are bottom or side-hinged, and are hand operated and self closing. Many sizes are available as well.

Trash chute replacement parts are a very important part of building maintenance. Now, thanks to the friendly staff at American Chute Systems, you no longer have to be in the dark.

"We offer speedy and reliable delivery for all of our products. All you need to do is pick which products you need with our help. Call us at 815-671-4780 to let us help you decide on what you need. Then, we will send them over immediately so that your trash or linen chute remains up to standard."
