

Cancer Compliance Specialists

CHAMPS Oncology partners with cancer programs nationwide to transform quality cancer data into valuable information — information that can be used to achieve accreditation, strategic planning, community outreach and cancer care objectives.

We are proud to claim a high compliance rate for our new and existing clients. Over the past few years, CHAMPS Oncology has partnered with dozens of cancer programs seeking accreditation for the first time, and 100% of those cancer programs are now Commission on Cancer (CoC) accredited, many with commendation.

For 35 years, CHAMPS has worked to raise the bar for the cancer registry profession. That's why the CHAMPS team consists of multi-credentialed professionals, including CTRs and CoC-trained Consultants.

As veterans of the cancer registry, CHAMPS has worked with CoC cancer programs nationwide, providing them with best practices, expertise and consulting services to maintain compliance.

Learn more at www.CHAMPSoncology.com.

Encouraging education and ongoing training is one way to raise the bar for the registrar. At CHAMPS, we feel the increased demand for quality data is our call to action. CHAMPS requires all of our CTRs to attend annual local, regional, state or national education conferences to ensure they are knowledgeable in the latest compliance standards.

- Toni Hare, RHIT, CTR, CoC-trained Consultant,

CHAMPS Oncology Strategic Services

Commission on Cancer (CoC) Consulting: With four CoC-trained Consultants on staff, CHAMPS Oncology provides guidance and expertise to new and existing cancer programs that have chosen to go through the CoC accreditation process. Our CoC consulting includes the following steps:

- Cancer Program Assessment
- Survey Readiness & Preparation
- Comprehensive Action Plan
- Consultative Evaluation (Mock Survey)

Cancer Registry Management and Operations: CHAMPS' comprehensive, team approach to cancer registry management and operations includes performing cancer registry activities, consulting and management. This comprehensive approach aims to position your registry as a strategic partner with your cancer program. Services include:

- Casefinding, Abstracting, Follow-Up
- Special Studies, Outcome Reporting
- Cancer Registry Policies and Procedures Manual
- Productivity and Workflow Analysis
- Qualified CTRs and Registry Resources
- Cancer Registry Management & Consulting
- State & National Data Submission

Abstracting Assistance: Accurate, quality and timely abstracting is essential for data collection; cancer program evaluation; and reporting of survival and treatment outcomes to local, state and national agencies. CHAMPS abstracting services include:

- Data Collection
- Compliance with State & National Guidelines
- Qualified CTR Abstractors
- External Quality Control Audit

Customized Services: CHAMPS is widely known for their ability to offer creative, custom solutions to any cancer registry issue or opportunity. Examples of customized solutions include:

- Presenting and Implementing New CoC Standards
- State Reporting for Non-Accredited Facilities
- Managing non-Certified Tumor Registrars
- Implementation of Best Practices
- Setting up New Cancer Programs

Workflow and Productivity Analysis: CHAMPS works side-by-side with your management team to perform a complete assessment of your cancer registry's workflow and productivity, services include:

- Cancer Registry Assessment
- Productivity Measurement
- Quality Control of Registry Database
- Staffing Workflow Analysis
- Detailed Outcomes & Analysis

Quality Control: CHAMPS consultants are empowered by advanced analytic tools developed in-house to streamline the process of turning quality cancer data into usable information. CHAMPS Quality Control Plan can include the following processes

- Establish and Implement Customized Quality Control Plan
- Monitor Registry Operations for Quality, Timeliness, and Accuracy
