

POWERED BY 3DEEP® TECHNOLOGY

The Newa Skin Rejuvenation System uses the same 3DEEP® technology already proven in tens of thousands of treatments by doctors in clinics worldwide. Like FDA-cleared 3DEEP professional systems, Newa allows for effective, safe and absolutely painless skin rejuvenation and tightening.

WHAT IS 3DEEP® TECHNOLOGY?

Used by some of the world's top dermatologists and plastic surgeons, EndyMed's patented 3DEEP radiofrequency (RF) technology is the safest and most effective technology available today for wrinkle reduction and skin tightening. Multiple positive and negative electrodes work together in a highly controlled way, enabling precisely targeted energy delivery. The energy is directed vertically into the deep dermal tissue, so that very little energy flows along the skin's surface. This keeps the skin relatively cool, while achieving the deep-skin heating necessary to optimize production of new collagen.

3DEEP® Technology Regenerating Your Skin From Within

3DEEP RF provides focused and contained energy flow deep within the dermis to promote collagen regeneration, safely rejuvenating the skin and reducing the appearance of fine lines and wrinkles.

ENDYMED MEDICAL

EndyMed Medical Ltd., established in 2007, is a cutting-edge medical device company that develops and commercializes energy based aesthetic treatment systems for the professional and home use markets. EndyMed's proprietary 3DEEP™ radiofrequency technology is a unique solution for fractional skin resurfacing, wrinkle treatment, skin tightening and body contouring.

ADVANCE TO THE NEXT LEVEL OF SKIN REJUVENATION

Start showing the world a more youthful you –
with firmer, smoother, more radiant skin in just one month!

The Newa Skin Rejuvenation System is clinically proven to reduce the appearance of fine lines and wrinkles, balance skin tone and visibly improve skin texture. With the Newa, your skin makes new collagen, which lifts your face and neck and leaves your skin smooth and firm. Developed by an internationally renowned dermatologist, the Newa enables you to safely use the most advanced professional skin rejuvenation technology in the comfort and convenience of your own home.

HOW IT WORKS

As we age, our skin begins to lose collagen and elastin, resulting in the deepening of fine lines and wrinkles and leading to sagging skin. Newa helps to reverse this process by delivering precise amounts of heat directly to the collagen layer deep within your skin. This starts immediate skin tightening and triggers your skin to produce new collagen and elastin fibers over the long term.

JUST 2 SIMPLE STEPS TO YOUNGER LOOKING SKIN!

Step 1:

Apply the Newa Activator gel to the active tip of the Newa

Step 2:

Place the Newa on your face and start your treatment

SET YOUR OWN TREATMENT PLAN

Use Newa when and where it suits you. You can customize the length of your treatments, according to your target treatment areas. The recommended treatment schedule starts at 8 minutes 5 days a week (for 1 facial area on each side of the face), adding 4 minutes for each additional treatment zone. After the first month of treatments, you can maintain and enhance the results you've achieved with just 1 – 2 follow up treatments per week.

Monitor your skin rejuvenation progress with a personalized treatment plan you can download from www.mynewa.com

WHAT TO EXPECT

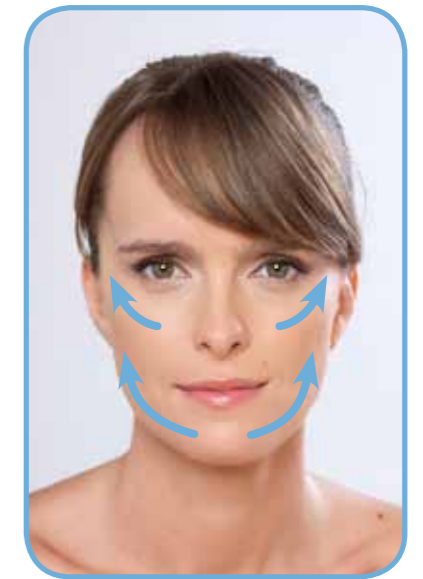

Fast and effective results – Right after your first treatment, your skin will look and feel tighter, with a radiant glow and smoother skin texture. Over the course of the treatment period, the collagen layer within your skin will be rejuvenated and continue to produce new collagen, which will further reduce the appearance of wrinkles and lift your face and neck. By continuing with maintenance treatments, you can achieve long-lasting results.

Safe, pleasant treatments – The Newa utilizes the gently warming effects of naturally occurring, harmless radio waves. It delivers energy exactly where it is needed, at the right level for completely safe and optimal treatment. Sophisticated safety features, such as sensitive temperature and motion sensors that control the Newa energy delivery, prevent your skin from overheating. A Newa treatment feels like a warm facial massage.

Gentle and non-invasive – The Newa is a non-invasive treatment system, without injectables, fillers, potentially harmful chemicals or toxins. Improvements are gradual and, with continued maintenance treatments, long-lasting.

So simple to use! – The Newa is ergonomically designed for comfortable, easy use. With the Newa in your hand and the specially formulated Newa Activator gel, you're on your way to younger looking, smoother skin right from day one.

TREATMENT AREAS

Upper cheeks and lower cheeks/jaw line

Under the chin

The Newa™ Advantage

- 1 Most advanced technology – Used by top dermatologists
- 2 Completely safe - With unique, double safety mechanism
- 3 Effective on all skin types and colors
- 4 Set your own treatment schedule – Convenient, at-home treatments whenever it suits you
