

MSC
is the best way for
school administrators
to keep in touch
with parents and
provide pertinent
information instantly.

MyStudentCare (MSC) was developed by working closely with educators and administrators at all levels. The end result is a series of modules that has evolved into the **best student services product** on the market. We call it "student services" because it addresses all of the service areas focusing on students during the school day. MSC features a user-friendly interface and is accessible through many portable devices such as smartphones, tablets, notebooks and laptops.

MSC is an efficient and powerful solution that is in tune with the needs of today's modern schools, teachers, and parents. It **automates several business processes** of each school reducing duplicate paperwork, while **increasing accountability** and parental involvement leading to successful students and schools.

Parents receive notification of their student's activities, incidents and announcements. Parents can register for activities such as sports participation, school field trips, class pictures, fundraising sales, etc. and contact the school using a computer or mobile device.

MSC modules reflect the daily activities of teachers, administrators, nurses and principals electronically. It minimizes tedious and time consuming tasks and puts them into an electronic format, increasing efficiency and productivity. An auditable electronic trail replaces mounds of paper and the potential for information to be released, avoiding violations of HIPAA privacy rules while ensuring security and accountability.

Testimonials

MyStudentCare has allowed us to communicate with our parents in a more in-depth way. We are really enjoying the incidents aspect of the program.

Administrator, Texas School

MyStudentCare is a fabulous program. If you are trying to increase your rate and level of communication with your parents, then this program is for you!

Superintendent, Texas School

Incidents Module

Throughout the normal school day, whether elementary, middle or high school grade level issues involving students arise. All incidents and announcements can be documented efficiently and securely when and where they occur. Parents can be notified immediately. All MSC modules can be customized to meet your state guidelines for training and reporting.

Health Management Module

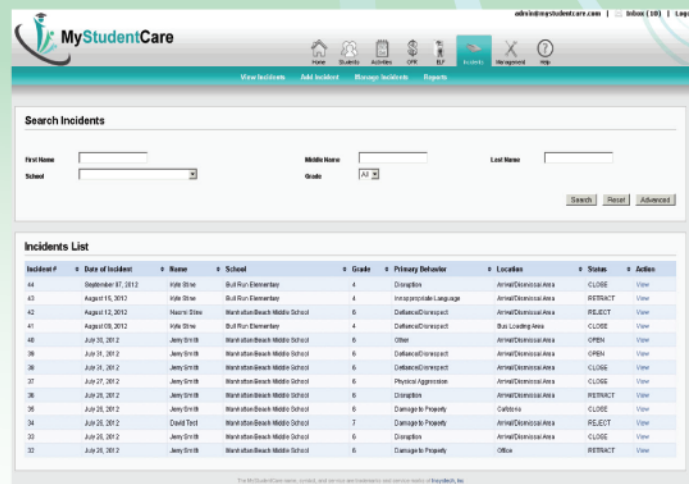

Whether dealing with emergency contact cards or health forms, notifying parents of health incidents with their children, or educating parents on health related issues this module saves school officials and nurses valuable time. The health management module also creates a quick and easy way to communicate with parents and first responders.

ELECTRONIC LITERATURE FOLDER (ELF)

Communications Module

Timely communication with parents, teachers, administrators and the community is the key to success. Use our proactive module to communicate with parents and the community through email and SMS text messages. The communications module acts as a hub in guiding the daily flow of information from the various MSC modules which form a life line between parent, student, school and community.

Incident #	Date of Incident	Name	School	Grade	Primary Behavior	Location	Status	Action

Activities Module

Automate the entire business process of all student activities conducted by the teacher, school or PTA/PTO/Volunteer organizations within your school. The activities module simplifies the tasks of sending notifications of scheduled events and collecting various forms and associated fees for school events. Parent volunteers can be scheduled using this module increasing efficiency and reducing teachers' time away from instruction.

Electronic Literature Folder (ELF) Module

Our ELF module gets important forms, classroom updates, announcements, messages and documents home safely and efficiently while saving thousands of dollars in paper and copier costs. No more lost documents and folders. All of this with one touch!

Get your parents involved in their students' progress and your school will thrive. Get *MyStudentCare*.
