

AKARI
ELECTRONIC-TINTING INSERTS

amiPOWERSPORTS.COM

BLINDING SUN- every rider has experienced this at least once during a ride. Meet the next generation of eye protection for motorsport enthusiasts of all kinds. Whether you are a daily commuter or a weekend warrior, Akari® is your solution. This state of the art visor insert features e-Tint®, the patented liquid crystal technology enabling the rider to change tint from light to dark in less than 1/10th of a second. Complete control over your tint lies in a small button that mounts to the outside of the faceshield. Switch between light and dark instantly with the quick touch of a button, or automatically via the light-sensing photo cell. So toss the shades and ditch the extra tinted accessories. One visor is all you need to focus on what's important: you and the road.

AX.11

+ shown above

- Instant tint control
- Automatic or Manual mode
- Superior anti-fog coating
- Easily transferrable
- USB rechargeable battery
- Easy no-tool installation
- Additional UV protection
- Fail-safe mechanism

FEATURES

Automatic/Manual. You're in control.

The new & improved AX.11 electronics are housed in a sleek, aerodynamic casing. The insert can operate in traditional manual mode (on/off) by a simple press of the button, or it can operate in automatic, light-sensing mode. A built-in photo cell is located on the side of the button, changing the tint automatically.

Extended hours of battery operation. Ride On.

The Akari® system relies on an applied voltage to orient the liquid crystals and uses very little current. A fully charged AX.11 may have up to twenty (20) hours of tinted use, depending on usage. The inserts are powered by a lithium battery and rechargeable via a supplied micro USB cable.

Superior anti-fog. Exceptional vision.

Akari® inserts include a permanent anti-fog coating eliminating the need for re-application, like most wipe or spray-on anti-fog solutions. This feature is further enhanced by the double lens system.

Liquid Crystals. From the lab to the road.

e-Tint® technology relies primarily on a liquid crystal system. A mixture of dyes in a liquid crystal host is sandwiched between two curved flexible plastic substrates coated with transparent electrodes. By applying voltage to the substrates, the electro-optic response of the liquid crystal is used to control the tint of the device.

Enhanced UV protection.

While most motorcycle faceshields provide 98% UV protection, the Akari® insert offers additional UV protection through the liquid crystal system and double polycarbonate lens.

Easy to install & transfer. No tools. No hassles.

Install the insert into your faceshield in minutes - no tools necessary. Vinyl installation templates are provided with the insert to assure a centered and correct position on your faceshield. The AX.11 is easily transferrable to other faceshields - simply peel the insert up by the left tab and mount to your new visor.

Power fails. You don't.

The Akari® AX.11 is equipped with a "fail-safe" mechanism to ensure your safety on the road. In the event of a power failure, the insert will automatically default to clear.

Akari® AX.11 SPECIFICATIONS

Size:	One size fits all.
Colors:	Smoke
Helmet Compatibility:	The Akari® AX.11 is not compatible with all faceshields and helmets, specifically the HJC® RPS-10, Shark® Evoline, Arai® and dual-sport helmets.
Dimensions:	11.95" X 4.52"
Light Transmission:	40% swing
Battery Type:	Lithium Polymer (with charge protection) USB Rechargeable, 50 mAh, 3.7 V
Charge Life:	Storage time: about 3 weeks Usage time: 16-20 hours (typical usage ON 8 hrs. / OFF 8 hrs.) 600 charge cycles (retain 80% + capacity)
Operating Temp.:	Operating: 14 to 113°F (-10 to 45°C) Charging: 32 to 113°F (0 to 45°C)
Storage Temp:	14 to 113°F (-10 to 45°C)
Packaging/Contents:	Includes: Micro USB cable, External Button, Mesh Installation Template, and Owner's Manual
Limited Warranty:	Akari® products are backed by a limited warranty that covers material and craftsmanship defects for one (1) year from the date of purchase.
