Please carefully review your Digital Proof download for formatting, grammar, and design issues that may need to be corrected.

We recommend that you review your book three times, with each time focusing on a different aspect.

- 1 Check the format, including headers, footers, page numbers, spacing, table of contents, and index.
- 2 Review any images or graphics and captions if applicable.
- 3 Read the book for grammatical errors and typos.

Once you are satisfied with your review, you can approve your proof and move forward to the next step in the publishing process.

To print this proof we recommend that you scale the PDF to fit the size of your printer paper.

Preface

Creationism is the belief that the entire universe and all of life were created in a special act by a Creator. Creationism is based on the concepts contained within Scripture with an emphasis on the Genesis account of a seven day act of Creation. Creationism generally includes events in the early history of mankind such as the worldwide flood during Noah's time and the sudden dispersion of people and languages from the Tower of Babel.

The Creation Science League is a gathering of creationist speakers and organizations who have chosen to share at least some of their materials cheaply or freely. It is a group that actively promotes an understanding of creation and takes a stand against the fallacy of evolution..

The League Notebook is designed to be a central spot where a person can record all of their Creation Science notes. The information about these topics can be found in the free articles, videos, and books produced by the Creation Science League members (as well as many other creationist speakers). The Notebook also serves as an outline to the vast amount of evidence available for Creationism.

Searching for Life

"What happens after I die?" is one of the great questions of life. According to the Theory of Evolution, life is just a collection of molecules that have randomly come together for a time. At some point, for death to occur, these molecules are unable to continue functioning together and life ceases for that individual. Life is over. Yet people seem to innately have a sense of eternity, that life is more than just a bunch of molecules, and that the evolutionary answer to this question is lacking. According to Scripture and the account of the Creation, life has a spiritual aspect as well as a physical aspect. The person has a soul. There is the possibility of eternal life. In fact, as originally made, life was meant to be everlasting because death did not exist and would not exist until mankind had sinned. This leads to the need of having a Savior who can bring people back into a close and special relationship with the Creator and also bring back eternal life.

"And the LORD God formed man of the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul." Genesis 2:7

Creation in Scripture

Scriptural Creationism primarily explores the spiritual aspects of creation and examines why events in the physical have occurred the way they have occurred. This is largely based on the special relationship the Creator has with mankind. The effects of righteousness and sin are seen from the Garden of Eden, through the Flood of Noah's time and the Tower of Babel, by the lives of the Patriarchs and the Nation of Israel, and into today in our very own lives. This beautiful planet and the life upon it are reminders of our Creator's love while the catastrophic destruction of the planet stands as testimony to mankind's disobedience. Thankfully, our Creator has given believers the promises of salvation, eternal life, and the New Heavens and Earth.

"For thus saith the LORD that created the heavens; God himself that formed the earth and made it; he hath established it, he created it not in vain, he formed it to be inhabited: I am the LORD; and there is none else." Isaiah 45:18

Creation in Science

Scientific Creationism primarily explores the physical aspects of creation through the view of science and knowledge. Both the physical sciences which examine non-living matter and the life sciences which explore living matter show that the Creation is only a few thousand years old and that the Theory of Evolution does not work.

Creation in Society

Social Creationism primarily focuses on how an understanding of creation and the Creator impact society; or on how a lack of this understanding impacts society. It examines philosophy, religion, and morality while exploring the historical impacts of people and concepts both for and against Creationism.
