

PDF Restrictions and Watermark Upgrade

PDF PRINTING RESTRICTIONS

When information is uploaded into a data room, enabling this option restricts users from printing PDF documents when they are opened. This new feature is offered at a lower price point than our traditional Digital Rights Management tools.

If you are looking for a cost effective solution for sharing confidential information, this is a great option. **V-Rooms™** charges only by the amount of storage used and offers unlimited users, administrators and pages for your data room.

IMPROVED WATERMARK

Our upgraded watermark is now fully customizable. You can control where the watermark appears, if the font is a solid or outline, and the color of the font.

Our watermark displays:

- Confidential
- User Name
- IP Address
- Full Name

In addition to the standard fields, there are now 2 custom text fields in the watermark. If there is information you would like to appear on every PDF, you now have the ability to dictate what will appear in the watermark.

The transparency of the watermark is now customizable as well. It can be made as light or dark as needed so the quality of your PDF's is not compromised.

Placeholder Document

This placeholder document illustrates the Dynamic Confidential Watermark Feature within **V-Rooms™**. With a CONFIDENTIAL watermark emblazoned on each page of pdf documents that includes the user's actual name and computer IP address, along with the exact date and time, users are discouraged from the unauthorized distribution of this sensitive information.

CONFIDENTIAL
