**RE: NEW 2011 – 2012 FORD F-150 TRUCKS**

---

Sno-Way “SERIES 26” straight blade snowplows (6’-8” & 7’-6”) and Sno-Way “SERIES 26R” winged snowplows (8’-0”) have met all U. S. Federal Motor Vehicle Safety Standards (FMVSS) for vehicle weights in regard to all new 2011 – 2012 Ford F-150 trucks. Based on these standards, as well as Sno-Way R&D test results, Sno-Way has approved these snowplows for the new 2011 – 2012 Ford F-150 trucks and is listing them in application lists and sales literature.

Sno-Way R&D and field testing of the Series 26 and Series 26R snowplows were successful with the 2011 – 2012 model F-150 trucks, including the popular EcoBoost model. Successful field test results were also obtained from actual end users and owners of F-150 trucks, including EcoBoost, during both actual plowing operations and road transport situations. The new F-150 trucks, including the EcoBoost model, have not experienced any negative effects on the vehicle computer system, charging system, or intercooler system.

**Vehicle Specific Parts Required:**

---

**Mount Kit # 99100962 or # 99101087**

**Center Member # 99100890**

**EIS Harness # 99100859**

**Shim Kit # 96114192 (EcoBoost only)**
