**TOUCHSCREEN ERASER** | pocket size

# smudger™

## TOUCHSCREEN ERASER | pocket size

The sleek new way to remove fingerprints and smudges from your touchscreen without chemicals or sprays. In just a few quick swipes you'll have a beautiful view of your photos, apps and videos. Best of all, it slides neatly into your pocket so you can take it anywhere.

### How it works.

Simply remove the clear cap and begin wiping the fabric tip across your touchscreen. Use short quick wiping motions in a variety of directions - similar to erasing a chalkboard. It's easy, smart, and just plain fun to use.

### It fits in your pocket.

Tuck it in your pocket or purse. The Smudger™ Touchscreen Eraser is so small and discreet you won't even know it's there until you need it. Go ahead and take it everywhere.

### The fabric wiping blade is replaceable.

When your Smudger™ Touchscreen Eraser is ready for a fresh new replacement blade - simply insert a new fabric blade into the eraser's base.

*\*Additional replacement blades sold separately.*

### Keep all your devices smudge-free.

The Smudger™ Touchscreen Eraser cleans just about any glossy touchscreen device. It's never been easier to keep your smartphones and tablets smudge-free...on the go.

enjoy a beautiful view
