

UK Credit Limited Expands Business Premises

In order to meet increasing customer demand UK Credit Limited have moved to larger office premises, complete with brand new office equipment and facilities.

UK Credit Limited, an unsecured loan provider offering guarantor loans in the UK, has moved offices this November in time for the holiday period. The move was made to accommodate recent growth in staff numbers as customer levels increased throughout the year; as a result they outgrew their old office.

The new office sports a brand new training area to get the most out of their new recruits and a more modern environment for the whole team. The new office space is approximately five times larger than where they were previously residing.

The new office not only allows for more staff but also an increased level of service for their customers with more capable facilities. They have recently been flaunting their ability to pay out guarantor loans on the same day the application is made.

Talking about the move, Operations Manager Paul Fairweather said “With our current level of growth the office move was a necessity. This will allow us to maintain continued expansion while also consistently offering a first class level of customer service; in fact I feel service levels have improved in many areas since the move.”

“Overall it has been a great morale boost for the existing team, and it is the positive mentality of our staff that really drives us. With Christmas just around the corner we are all geared up to offer customers what we believe to be the best experience on the market.”

UK Credit Limited was established in early 2010 as an alternative to traditional unsecured loans. With a focus on helping people with a less than perfect credit history the company has gone from strength to strength since launch. What they believe separates them from the rest of the market is their strong focus on responsible lending and treating customers fairly.
