

How do you take the “Gold Standard” security policy reference library and make it even *better*? This is what some of our 7000 *Information Security Policies Made Easy* customers requested:

- Have it **continually updated** with new policies covering the latest threats
- Have it **available online** so I can get access anytime without downloads or delivery
- Make it even **easier to use**, with better navigation, searching, and online tutorials
- Make the policies **more relevant** by linking them to real-world incidents and regulations
- Make it **affordable**, with a quick return on investment.

## Introducing PolicyShield™ Information Security Policy Subscription Service

### *Keeping your security policies up-to-date*

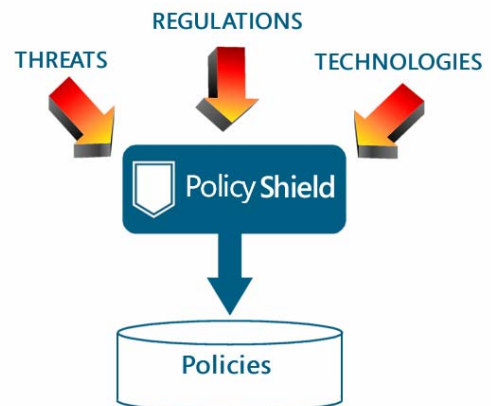

To reduce risk and maintain compliance with security and privacy laws, security policies must be living documents that are periodically reviewed and updated based on the latest technologies, regulations and threats. PolicyShield provides regular updates of actionable policies and time-saving tools in response to the latest information threats.

### *Saving Valuable Time*

Most information security and privacy managers want to update written policies, but the process of monitoring incidents, reading regulatory requirements and reviewing new technologies is extremely time consuming. PolicyShield acts as your on-demand information security consultant, freeing up valuable time so you can focus on critical information security tasks.

### *The fastest way to get policies into action ... and keep them relevant*

Whether your organization is just beginning to develop policies or has a mature security policy program, PolicyShield is the most cost-effective way to build and maintain a quality set of information security policies.

## Product Features

### The Most Complete Security Policy Library Available

The PolicyShield policy library includes over 1500 individual pre-written information security policies and expert commentary all mapped to the ISO 17799:2005/27002 security framework. PolicyShield is based on *Information Security Policies Made Easy* by Charles Cresson Wood, the “gold standard” security policy library used by over 7000 organizations in 50 different countries. The PolicyShield library covers over 300 different information security and privacy topics, including:

- Data Privacy
- Identity Theft
- Firewalls
- Encryption
- Electronic Mail
- Telecommuting
- Telephone systems
- Employee surveillance
- Electronic commerce
- Electronic records
- Digital signatures
- Desktop Security
- Computer viruses
- Contingency planning
- Logging controls
- Internet
- Intranets
- Instant Messaging
- Risk Assessments
- Governance
- And many more!

### Quarterly Updates to address the latest technologies, incidents and regulations.

Each quarter PolicyShield subscribers receive updates from our panel of information security and data privacy experts. Policies are written in response to the latest technologies, threats, regulations and major security incidents. Each policy contains detailed commentary, a target audience, and links to policies that cover similar topics. Policies may also link to other development resources that help enforce the policy within your organization.

### Policies mapped to real-world incidents and frameworks

Many organizations are responsible for demonstrating compliance against one or security and privacy regulations. PolicyShield goes the extra mile in helping you integrate new policies into your existing compliance program. PolicyShield provides detailed mappings for major regulatory requirements and frameworks such as ISO 270002, HIPAA, PCI DSS and COBIT. News articles keep you posted on changes to regulations that may impact your security policy program.

### Time-saving tools for getting policies published

The PolicyShield Policy Resource Library contains dozens of sample templates, checklists, whitepapers, and forms to help save time in policy development and deployment. The Resource Library contains a growing library of over 18 completely pre-written sample policy documents ready to customize.

### Quick and Easy to use

PolicyShield's secure web-based system is easy to navigate and allows you to quickly locate the information you need, when you need it. Browse or search for policies by keyword, ISO category or topic. Each pre-written policy comes with pre-written implementation advice and links to related policies, real-world incidents, and resources to help implement each policy with your organization.
