

Dermapen™
Advanced skin needling

Dermapen

Advanced skin needling

Dermapen - uses multiple needles that vertically pierce the skin. This enhances rejuvenation results and is far safer for the client because there is much less epidermal damage.

Dermapen - The automatic, high speed vibrating function of the Dermapen increases the effectiveness of treatment by rapidly creating multiple insertions, quickly and clinically, reducing pain & discomfort.

Dermapen - results are comparable to ablative treatments such as Fraxel, IPL, Laser Resurfacing, and Chemical Peels.

IMPROVES ACNE SCARS

IMPROVES ACNE SCARS & MINIMISES PORE SIZE

APPLICATION & EFFECT

Skin tightening, lifting and rejuvenation

Acne scars & wound healing

Improves wrinkles and fine lines

Minimises pore size

Improves stretch marks

Treats alopecia

ADVANTAGES

Speed - faster than manual MTS

Shorter treatment times

Adjustable needle depth

Lower price of consumables

Less pain

No cross infection - disposable needles

Light weight hand-piece

Easy-to-use

Minimal side effects

Easy-to-carry

Dermapen

Advanced skin needling

- Minimised epidermal damage means less pain and erythema
- Easy to manoeuvre around all facial contours with the benefit of adjustable needle heights
- Because of vertical delivery, needles easily penetrate scar tissue without risk of bending
- Creates multiple insertions quickly

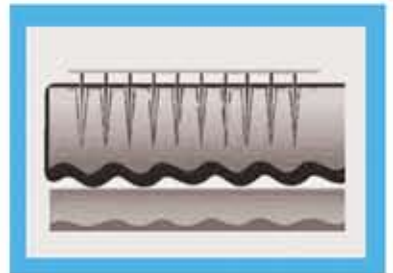

VS

DERMAL ROLLERS

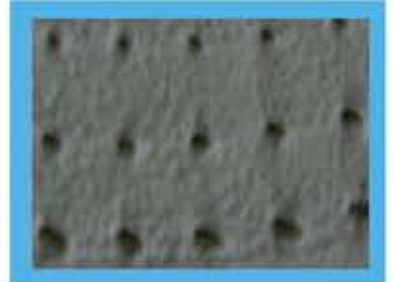

- More Painful with a lot more bleeding due to epidermal damage caused by flick and tear action
- Difficult to use in small or curved areas
- Difficult to insert needles into scar tissue - needles can be bent
- No needle height adjustment for areas such as eyes and lips

VERTICAL INSERTION METHOD

SLOPED/CURVED INSERTION METHOD
